

Zahid Khan

Civil QAQC Manager (Red Sea Approved)

A dedicated and results-driven Civil QAQC Manager with over 12 years of experience in the construction industry, including 10 years in the Kingdom of Saudi Arabia (KSA). Expert in managing civil and structural quality control for diverse construction projects. Adept at preparing and implementing quality assurance plans, inspecting construction processes, and ensuring compliance with safety and project specifications. Proficient in managing a team to drive operational excellence and minimize risks associated with non-conformance. Expertise spans structural RCC, precast, general building, architecture finishing, and specialized services. Known for strong problem-solving abilities, leadership, and communication skills. Seeking new challenges to leverage my experience in quality management, supervision, and reporting.

WORK EXPERIENCE

Civil QAQC Manager

Abdul Mohsen Al Tamimi Contracting Co.

03/2023 – Present

Club House, Villas and Ancillary Buildings Shura -RSG The Turtle Bay, Central Sports Club, NPBC, Civil Architecture and MEP works

Key Responsibilities:

- **Inspection & Quality Control:** Implement and monitor quality control procedures for all civil and structural works, ensuring compliance with approved ITPs and project specifications.
- **General builder / Architecture finishing Works:** To prepare Work method statement, ITPs, checklist, Material submittals PQD and Material samples for structural RCC, Precast, General Builder and Architecture finishing works i.e. Masonry block works, Plastering, Paints, Screed, epoxy, fire-rated metals, Wooden and Aluminum doors and Frames, Suspended ceiling, Raised Floor, Phenolic insulation, EIFS, and EIFS Timber insulation system in 75 villas, waterproofing, Ceramic/Porcelain Tiles, steel structure, Canopy and dry wall installation works
- **Documentation Management:** Prepare and submit detailed quality reports, including PQDs, material submittals, and method statements for approval. Updating the TOC Dashboard on weekly basis and sharing with RSG team. Quality internal and external audits. Submitting monthly PQI Report to client.
- **Team Leadership:** Lead and manage a team of QAQC professionals, ensuring adherence to quality management practices and effective coordination with the project team.
- **Compliance Monitoring:** Coordinate with consultants and clients to ensure construction work meets quality standards and resolve issues related to non-conformance (NCR).
- **Materials Testing:** Oversee materials testing, ensuring compliance with industry standards and approved third-party laboratory tests.
- **Progress Reporting:** Prepare and present weekly and monthly quality reports to the client, highlighting key milestones, quality issues, and corrective actions.
- **Inspection Coordination:** Conduct regular site inspections for architectural, structural, and MEP works to ensure all stages meet the required quality standards.
- **Warranty & O&M Documentation:** Ensure proper documentation for project handover, including warranties, O&M manuals, and closeout documentation.

Civil QAQC Manager

Al Yamama Contracting Company/SIC, Shura Island, Umloj, KSA

Feb 2021 - Mar 2023

Key Responsibilities:

- **Quality Control Implementation:** Implemented the approved Quality Control Plan (QCP) and adhered to the Inspection and Test Plan (ITP) to ensure conformance and minimize rework or non-conformances.

- Standards Compliance: Ensured all construction works met project specifications and quality standards during the construction phase, providing a clear quality assurance throughout the project lifecycle.
- Issue Resolution: Resolved conflicts between client representatives and construction teams, proposing corrective actions to avoid project delays and work rejections.
- Construction Monitoring: Monitored all civil and architectural works, ensuring compliance with project standards, specifications, and regulatory requirements, ensuring no discrepancies during construction.
- Supervision of Structural Works: Supervised the construction of structural components, including formwork, reinforcement steel, and concrete pouring for beams, columns, and slabs, ensuring alignment with quality procedures.
- Drawing Reviews: Reviewed shop drawings, redlines, and as-built drawings, ensuring accuracy, compliance, and proper documentation for project deliverables.
- Inspection & Reporting: Managed the preparation and submission of inspection reports and Non-Conformance Reports (NCRs), ensuring timely feedback and corrective actions were implemented.
- Coordination of Inspections: Coordinated inspections for plumbing, drainage systems, and quality checks, ensuring all works aligned with project specifications and quality assurance procedures.

Senior Civil QAQC Engineer

Safari Group

02/2020 - 02/2021

Key Responsibilities:

- Structural Supervision: Conduct inspections of structural works, including formwork, reinforcement steel, and concrete pouring, ensuring compliance with industry standards.
- Client Coordination: Act as the primary point of contact between the construction team and the client to resolve quality issues and maintain client satisfaction.
- Audit Management: Perform internal and external audits to assess the effectiveness of the quality management system and identify areas for improvement.
- Testing Oversight: Supervise concrete testing and quality checks for all civil works in accordance with project specifications and safety standards.
- Quality Control Reporting: Maintain detailed records of inspections, tests, and quality control measures, reporting findings to senior management.
- Non-conformance Management: Monitor and close non-conformance reports (NCR), implementing corrective actions to prevent future occurrences.
- Training & Development: Provide training to junior engineers and site personnel on quality control practices and industry standards.
- Safety Compliance: Ensure that all work activities comply with safety regulations, conducting risk assessments and safety audits as required.

Senior Geotechnical QAQC Engineer

Ground Engineering Contracture (GEC), Al Khobar, Jubail, KSA

Aug. 2015 - Feb 2020

Key Responsibilities:

- Quality Control: Managed geotechnical design for bored piles, stone columns, shoring works, and deep foundations, ensuring compliance with engineering specifications and quality standards.
- Construction Supervision: Supervised and inspected civil pile construction activities, ensuring all foundation work adhered to quality control procedures.
- Reporting & Documentation: Prepared detailed production reports, including daily drilling records and monthly production returns, for internal tracking and client updates.
- Testing & Inspection: Executed Pile Integrity Testing (PIT), Cross Hole Sonic Logging (CSL), and Dynamic Load Testing (DLT) to assess the integrity of foundation piles and deep foundations.
- Design Compliance: Ensured soil replacement and stone column installation met geotechnical specifications and design integrity for optimal foundation support.
- Pile Testing: Expert in all types of piling testing including CLT, PIT, DLT, LLT, TLT, PLT, CHCL, and Pile Integrity Testing.
- Foundation Design & Execution: Specialized in bored piles, secant piles, CFA piles, and testing works.
- Soil Improvement & Stabilization: Skilled in DC, DR, and RIC techniques for soil improvement.
- Advanced Geotechnical Software Applications:
 - Soil Replacement & Stone Columns Design using DC Vibro (German Software).
 - Temporary Earth Retaining System Design using DC Pit (German Software).
 - Geotechnical Settlement Calculation using SETTLE 3D.
- Geotechnical Investigation & Testing: Extensive experience in field and laboratory testing, including Cone Penetration Testing (CPT) and Standard Penetration Testing (SPT).
- Shoring Works & Anchors: Expertise in designing and executing shoring works and tie-back anchors.

Tunnel Engineer - Geotechnical Engineer

GRC (PVT) Limited Pakistan, Hydro Power Project

Feb 2014 - Mar 2015

Key Responsibilities:

- **Tunneling Supervision:** Supervised the planning and design of tunneling works, ensuring proper application of the drill and blast method for efficient tunnel construction.
- **Geological Mapping:** Coordinated and managed excavation and geological mapping activities, ensuring accurate geological assessments for tunneling operations.
- **Support System Design:** Designed and implemented tunnel support systems, including shotcrete, rock bolts, and lattice girders, ensuring structural stability.
- **Compliance Monitoring:** Monitored the installation of rock support systems, ensuring full compliance with project specifications and safety standards.
- **Progress Reporting:** Produced detailed geotechnical analysis reports and tunneling progress reports for stakeholders, ensuring project timelines were met efficiently.

Material Engineer

IKAN AND AKB JV Engineering Services, Lahore, Pakistan

Jun 2013 - Feb 2014

Key Responsibilities:

- **Material Testing:** Evaluated laboratory test results and prepared materials testing reports to ensure compliance with industry standards, including concrete and soil tests.
- **Concrete Mix Design:** Designed concrete mixes for various classes of concrete, ensuring all mixes met ACI standards for strength, workability, and durability.
- **Quality Control Testing:** Conducted compressive strength, slump, and other concrete-related tests to ensure material quality and construction compliance.
- **Aggregate Testing:** Performed testing on aggregates, including crushing tests, soundness tests, and specific gravity tests to ensure high-quality material selection.
- **Soil Analysis:** Monitored and conducted soil testing, including Atterberg limits and FDT tests, to assess soil suitability for construction and project specifications.

CERTIFICATION

- ISO 9001:2015 Lead Auditor - CQI-IRCA
- Certified Quality Management Prepositional - From American Institute of Business & Management
- Lean Six Sigma Yellow, Green, Black Belt - The Knowledge Academy UK
- Pile Integrity Testing (PIT) - Pile Dynamic, Inc.
- Cross Hole Sonic Logging - Olson Instruments Inc.

SCE Membership: Saudi Council of Engineers #1063674

Dear Hiring Manager,

I am writing to express my interest in the Civil QAQC Manager position. With over 12 years of experience in civil quality assurance and control, including 10 years in the Kingdom of Saudi Arabia, I have honed my skills in managing large-scale projects while ensuring strict adherence to project specifications, safety standards, and client requirements. My extensive experience with civil and structural quality control, combined with my expertise in project documentation, non-conformance management, and team leadership, has enabled me to drive efficiency and mitigate risks in every project I undertake.

Throughout my career, I have been responsible for preparing and implementing detailed work method statements, conducting regular site inspections, and ensuring compliance with the latest quality control standards. My experience spans multiple sectors, from luxury villas to large infrastructure projects. I have demonstrated my ability to lead cross-functional teams, manage client relationships, and resolve issues swiftly to ensure timely and cost-effective project completion.

I am confident that my leadership, technical expertise, and commitment to excellence will make me a valuable asset to your team. I look forward to the opportunity to contribute to your organization's success and am available for an interview at your convenience.

Thank you for considering my application.

Sincerely,
Zahid Khan
