Fit out Contracting, Architectural Finishing & FF&E

RIYADH METRO-LINE 3 'DEEP UNDERGROUND STATIONS'

Design and Planning: Review detailed designs and plans for housing villas projects, including calculations, drawings, and specifications. Collaborate with architects, surveyors, and other engineers to create cohesive project plans.

Site & contractors management: Supervise site activities and ensure compliance with project plans and safety regulations. Coordinate with contractors and subcontractors to ensure smooth progress and resolve on-site issues & Monitor contractor performance and ensure work is completed on time and to quality standards.

Project Management: Manage and oversee all stages of civil engineering projects, from initial planning through to completion. Ensure that projects are delivered on time, within scope, and within budget.

Construction Supervision: Monitor and inspect construction activities to ensure adherence to design specifications, quality standards, and safety regulations. Address any issues that arise during construction and implement solutions.

Cost Estimation and Budgeting: Prepare cost estimates for upcoming activities, and cost monitoring for running activities, estimate and quantify required materials and prepare look a head plans.

Risk Management: Identify potential risks and challenges in the project and develop mitigation strategies to address them. Ensure that all risk management practices are followed throughout the project lifecycle.

Sustainability and Environmental Considerations: Incorporate sustainable design principles and consider environmental impacts in all project plans and decisions.

Communication and Reporting: Prepare and present reports, proposals, and project updates to clients, stakeholders, and management. Maintain clear and effective communication with all parties involved in the project.

Technical Documentation: Prepare and review technical documentation, including design calculations, specifications, and reports. Ensure all documentation is accurate and up to date.

Team Collaboration: Work collaboratively with other engineers, drafters, and project managers to ensure project success. Provide technical guidance and support to junior engineers and other team members.
