PROFILE

QA/QC Engineer with experience in civil construction projects, specializing in quality assurance, site inspection, and project documentation. Skilled in implementing QA/QC procedures, preparing ITPs, method statements, and ensuring compliance with project specifications and standards. Experienced in site supervision, material inspection, progress reporting, and coordination with clients, consultants, and subcontractors. Proven ability to handle residential, commercial, and infrastructure projects with a focus on quality, safety, and timely project delivery.

PROFESSIONAL EXPERIENCE

2023 – 2024
Tamil Nadu, India

QA/QC ENGINEER, GSV Technical Development Company For Contracting

Project: Construction of LPG Based Crematorium
Client: City of Municipal Corporation

Responsibilities:

- Implementing and monitoring Quality Assurance & Quality Control procedures for civil construction activities as per project specifications, standards, and codes.
- Inspecting site activities such as excavation, concreting, reinforcement, formwork, blockwork, plastering, and finishing works to ensure compliance with approved drawings and quality standards.
- Preparing and reviewing Inspection Test Plans (ITP), Method Statements, and Material Submittals for client/consultant approval.
- Conducting regular site inspections, material inspections, and monitoring work progress to ensure quality requirements are met.
- Maintaining proper documentation of inspection reports, material approvals, test results, NCR (Non-Conformance Report), and corrective actions.
- Coordinating with consultants, clients, and subcontractors regarding quality-related issues and inspections.
- Monitoring and verifying all materials delivered to the site meet project requirements and specifications.
- Assisting in internal and external audits and ensuring the implementation of corrective/preventive actions.
- Preparing snag lists, punch lists, and ensuring rectification prior to project handover.
- Ensuring implementation of safety and quality standards throughout the project execution.

2020 – 2022
Tamil Nadu, India

SITE ENGINEER, Projects: Residential Building And Commercial Buildings

- Supervision and execution of all civil construction activities at site as per approved drawings, specifications, and safety standards.
- Preparing daily, weekly, and monthly progress reports and submitting them to the project manager or client.
- Coordinating with consultants, subcontractors, and other departments for smooth project execution.
- Ensuring proper quality control by inspecting materials and workmanship at every stage of construction.
- Preparing site measurements, quantity estimation, and BOQ (Bill of Quantity) for materials and resources.
- Monitoring manpower, equipment, and material requirements on-site to avoid delays.
- Managing and supervising site activities like excavation, backfilling, reinforcement, shuttering, concreting, masonry, plastering, and finishing works.

- Handling technical issues and resolving them on-site in coordination with the project management team.
- Ensuring compliance with health, safety, and environmental standards at the construction site.
- Preparing as-built drawings and assisting in project handover process.
- Checking and reviewing shop drawings, bar bending schedules, and material submittals.
