Studying SOWs from clients, estimating cost, validating time schedules for all concerned activities, assisting consultants to meet client's requirements, finalizing and handling project execution team, overseeing preparation of SOW for each individual involved in the project. Witness of all destructive testing, field density test, Temperature test, slump Tests, pre-pouring, routine inspections.

Coordination with third party inspection / Client as per the contractual requirement and also worked as contractor representative & third-party inspector (TPI).

### **OBJECTIVE:**

Looking to the work in a challenging environment where I can use abilities work experience and can grow up with the team of professionals & looking to build on extensive range of technical skills within a suitably challenging role. Keen to achieve further professional development. Now looking for a new and challenging position, one which will make best use of existing skills and experience while enabling further personal and professional development.

## KEY QUALIFICATIONS:

Self-motivated with strong leadership skills, managing and implement QA/QC system. Looking forward a new challenging position to streamline my skills.

## DETAIL OF EXPERIENCE IN (SAUDI ARABIA

### 1. Gulf Cryo.

#### Type of work & responsibility:

- approval of material approvals used in project.
- approval of all types of concrete used in project.
- approval of all materials used in project (steel, soil types and chemicals).
- implementation and maintenance of quality system e.g. (training of lab staff and calibration of lab equipment's).
- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

### PROJECT: GULF CRYO INTEGRATED INDUSTRIAL GASES

#### FACILITY PROJECT

**Main Contractor:** Gulf Cryo

**Client:** MA'ADEN PHOSPHATE COMPANY (MPC)

**PID:** INTERTEK

**Position:** QC Supervisor

**Duration:** JUNE 2024 – M A R 2 0 2 5

### 2. Abdul Rasheed Contracting Establishment.

#### Type of work & responsibility:

- approval of asphalt mix used in project.
- Asphalt link roads work in Water theme park and water treatment facility, parking area and access road from main road to site office road.
- approval of all types of concrete used in project.
- approval of all materials used in project (steel, soil types and chemicals).
- implementation and maintenance of quality system e.g. (training of lab staff and calibration of lab equipment's).
- follow up the routine test daily and weekly to insecure the material quality (asphalt BBC, BWC, soil, sub grade, sub base, bitumen and aggregate).
- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

**Project:** Six Flags Qiddiya Project

**Main Contractor:** BBI & Saudi Al Mabani

**Client:** Qiddiya Investment Company

**Consultant:** ATKINS

**Position:** QC Supervisor

**Duration:** Feb 2022 – Jan 2023

**ATKINS**

### 3. Company RANCO&ZAMIL Concrete Industries.

#### Type of work & responsibility:

- approval of asphalt mix used in project.
- Asphalt link road works inside the STC Compound, parking area and access road from main road to site office road.
- approval of all types of concrete used in project.
- approval of all materials used in project (steel, soil types and chemicals, finishing materials, MEP materials).

- implementation and maintenance of quality system e.g. (training of lab stuff and calibration of lab equipment's).
- follow up the routine test daily and weekly to insecure the material quality (asphalt BBC, BWC, soil, sub grade, sub base, bitumen and aggregate).
- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

**Project:** STC New Technical Car Park Building Project (1450 Car Parking Space).

Admin Car Park Building Projects (3900 Car parking Space).

**Client:** Saudi

Telecom Company. **PMT:**

Hill International. **Consultant:**

Khatib & Alami

**Position:** QC Supervisor

**Duration:** May 2019 - Jan 2022

**3. Company:** HUTA Hegerfeld.

**Type of work & responsibility:**

- Approval of concrete repair, maintenance and surface treatment chemicals.
- Approval of asphalt mix used in project.
- Asphalt roads work inside the facility.
- Approval of all types of concrete used in project.
- Approval of all materials used in project (steel, soil types and chemicals).
- Implementation and maintenance of quality system e.g. (training of lab stuff and calibration of lab equipment's).
- follow up the routine test daily and weekly to insecure the material quality (asphalt BBC, BWC, soil, sub grade, sub base, bitumen and aggregate).

- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

**Project:** Upgrade West Pier Facilities – RT Project

**Client:** ARAMCO

**Position:** Civil QC

**Duration:** Jan 2019 to May 2019

---

#### **4. Company: ARABIAN BEMCO CONTRACTING CO. LTD**

##### **Type of work & responsibility:**

- Approval of asphalt mix used in project.
- Asphalt roads work inside the facility.
- Approval of all types of concrete used in project.
- Approval of all materials used in project (steel, soil types and chemicals).
- Implementation and maintenance of quality system e.g. (training of lab staff and calibration of lab equipment's).
- follow up the routine test daily and weekly to insure the material quality (asphalt BBC, BWC, soil, sub grade, sub base, bitumen and aggregate).
- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

**Project:** Qatif Closed Relief System & Flare Gas Recovery System

**Client:** ARAMCO

**Position:** Civil QC Inspector

**Duration:** Dec 2017 to Jan 2019

**5. Company: BEIJING CONSTRUCTIONS & ENGINEERING GROUP (BCEG)**

**Type of work & responsibility:**

- Approval of asphalt mix used in project.
- Approval of all types of concrete used in project.
- Approval of all materials used in project (steel, soil types and chemicals).
- Implementation and maintenance of quality system e.g. (training of lab stuff and calibration of lab equipment's).
- follow up the routine test daily and weekly to insure the material quality (soil, sub grade, sub base, bitumen and aggregate).
- conduct or supervise tests on raw materials or finished work in order to ensure their quality.
- Design and direct the testing and/or control of processing procedures.
- Evaluate technical specifications relating to project specifications and design objectives.
- Plan and implement laboratory operations for the purpose of project specification, and performance standards.
- Review plans and make recommendations for materials selection based on design objective.

**Project:** SABIC Secondary Housing Project Package – 6 Mutrafiyah

**Client:** SABIC – E&PM

**Position:** Civil QA/QC

**Duration:** OCT 2016 –

Nov 2017

Beijing Construction  
Engineering Group  
Co., Ltd

**6. Company: WISON / SENDAN**

**Type of work & responsibility:**

- Approval of concrete repair, maintenance and surface treatment chemicals.
- Approval of asphalt mix used in project.
- Approval of all types of concrete used in project.
- Approval of all materials used in project (steel, soil types and chemicals).
- Implementation and maintenance of quality system e.g. (training of lab stuff and calibration

of lab equipment's).

- follow up the routine test daily and weekly to insure the material quality (asphalt BBC, BWC, soil, sub grade, sub base, bitumen and aggregate).

**Subject:** RE: Maaden Gulf Cryo Integrated Industrial Gases Facility: Civil QC Inspector CV for Interview

Dear Mr. Antruse,

The proposed Civil inspector is interviewed and found conditionally approved for 3 months.

NOTE : Above Acceptance / Approval is subject to the actual performance of the candidates, MA'ADEN keeps the right to revoke the approvals, In case if the performance was found not up to the mark.

Thanks & Regards,

**Mohammed Shoeb Ali** | [Civil/Structural QC Inspector](#) | [Ma'aden Phosphate Company](#) | [Ras al khair](#) |
