The University of Haripur

📅 09/2015 - 08/2019

## EXPERIENCE

QC Inspector

Saudi Pan Kingdom (SAPAC)

(2023 – Present Riyadh – Saudi Arabia)

**Project: COMPREHENSIVE CORRIDOR PRINCE MESHAL BIN ABDULAZIZ ROAD – AL-TAIF ROAD**

**Roles & Responsibilities:**

- Responsible for QA/QC documents, including equipment calibration, test results, WIR, MIR, SOR, MOS, ITP, and all other relevant reports, ensuring compliance with project specifications.
- Oversee construction quality to ensure compliance with local and international standards, project specifications, and company QMS requirements.
- Prepare and review QA/QC reports, inspection requests, and non-compliance reports (NCRs).
- Conduct site inspections, material testing, and monitor third-party labs for compliance with project requirements.
- Review and approve quality control documents, technical submittals, and material submittals to ensure adherence to project specifications.
- Monitor implementation of the Project Quality Plan (PQP) and ensure adherence to approved ITPs.
- Identify quality issues, perform root cause analysis (RCA), and define corrective and preventive actions to prevent recurrence.
- Coordinate with consultants, subcontractors, and project teams to resolve quality issues and ensure project compliance.
- Ensure all approved drawings and revisions are implemented at the site.
- Inspection of construction work to ensure that it is being carried out according to the design.
- Performing Field density test (FDT) on site.
- Prepare daily, weekly, and monthly progress reports writing.
- Monitor the use of resources and ensure cost-effective execution.
- Preparation of daily construction report regarding site activities.
- Data collection and analysis using Excel.
- Maintain site records, including work inspections, material deliveries, and site instructions.
- Inspect materials and work to ensure compliance with quality standards and project specifications.
- Perform quality checks and witness key activities like concrete pouring and material testing.
- Understanding and applying construction shop drawings on the ground with attention to data.
- To control building work activities from foundation to the finishing.
- Knowledge of doing inspection according to the specification and scope of work.
- Ensure the proper implementation and compliance of quality control system within the project site.
- Taking care of QA/QC documents of the entire project including certificates, calibration, test result, non-compliance reports and site instructions/observation.

QAQC Inspector

RAD International Road Construction

(11-2021 - 11-2023 United Arab Emarat)

**Project: New Exit Road and Widening R/A 6 -R/A 5**

(1)

**Connecting Road to Sheikh Zahid Road – (Al-QUOZ 1 & Dubai Marina)**

(2)

- Inspect and test construction materials like asphalt, concrete, aggregates, and soil.
- Ensure materials comply with project specifications and standards (e.g., ASTM, AASHTO, IS codes).
- Conduct laboratory and field tests such as CBR test, compaction test, sieve analysis, bitumen content test, and concrete cube

strength test.

- Supervise and inspect site activities such as earthwork, subgrade preparation, base course laying, asphalt/concrete paving, and drainage construction.
- Monitor the compaction of soil layers and ensure proper density and moisture content.
- Check proper layer thickness, cross slopes, camber, and elevation levels.
- Prepare and maintain quality control reports, test records, and inspection checklists.
- Ensure proper documentation of all QC test results and corrective actions.
- Ensure road construction follows **government regulations, project specifications, and safety norms**.
- Check mix designs, bituminous works, and ensure adherence to standards like **AASHTO, and ASTM**.
- Identify **non-conformance issues**, defects, or deviations in construction.
- Recommend **corrective actions** and ensure implementation.
- Coordinate with the **site engineers and contractors** for rework when necessary.
- Conduct final quality checks before road section approval.

---

## QAQC Inspector (Earth work)

### IVCC Engineering (Pvt)

(01/2021 - 10/2021 Pakistan)

**Project: HYDRO POWER PROJECT LOWER SPAT GAH Indus tunnel portal 1,2. (2660MW Super Critical) (1)**  
**New Arcade city, Vin Tower, ....., Pearl Arcade**  
**T-4 Project Tarbella Dam extension.**

Site Assessment:

- Review existing Drawing, maps and reports for preliminary information.
- Design and developed mix design formula that suitable for roads and infrastructure projects according to the international specification's standard.
- Prepare all 'Standard Test forms' to be used in laboratory for test.
- Develop Plan and Systematic action necessary for the projects.
- Developed the different design mixes for concrete and Soil treatment.
- Prepare analysis report for compressive test result and durability for internal and external specimens.
- Ensure real implementation of QA/QC plan and related inspection activities as well as reported in standard format.
- Distribute the manpower according to work priority.
- Ensure qualification of staff and provide necessary training or support.
- Supervise the lab/site, checkpoint technicians.
- Perform any other duties deemed necessary by the Department Manager/ Project Manager.
- Conduct a site visit to observe surface conditions and gather initial data.

Testing:

- Conduct tests such as Density Test, Slump test, Proctor Compaction Test, Sieve Analysis.....
- Geological description of the site.
- Results of field and laboratory tests.
- Recommendations for construction or excavation, if applicable.
- Any potential issues or risks related to the rock formation.
