STRONG TECHNICAL SKILLS

- Demonstrating your ability to oversee all aspects of **construction projects**, including planning, scheduling, and execution. Managed multiple construction projects simultaneously, overseeing all phases from **inception to completion**, including **planning, scheduling, and execution**.
- Collaborated closely with **project managers, architects**, and other **stakeholders** to address any **technical issues, resolve conflicts**, and ensure project milestones were achieved. Implemented effective **quality control measures** to ensure construction activities met regulatory standards and client specifications, resulting in high levels of **client satisfaction** and project success. Maintained detailed **project documentation**, including **daily progress reports, site records**, and as-built drawings, to provide accurate project status updates and facilitate smooth handover processes. **Managed** a team of site engineers, supervisors, and subcontractors, providing **leadership, guidance**, and support to optimize team performance and achieve project objectives.
- **Monitored** project progress, budget, and resource allocation, **identifying and addressing** any deviations or challenges to ensure projects remained on track and within budget.
- Check & ensure the Construction Activity of **Precast Erection, Excavation, Compaction, Concrete pouring, Formwork, Steel fixing, Masonry, Finishing etc.** as per survey Level and drawing.
- **Check and ensure** the **Surveying Work**, Level, Distance, Coordinate, Point & Layout as per Survey drawing and working drawings.
