- Technical: Civil Engineering, Construction Management, Quality Assurance/Control, Safety Compliance, Regulatory Compliance.
- Project Controls: Cost Control, Schedule Management, Resource Allocation, Change Management, Reporting.

## EXPERIENCE

---

### **Project Manager - Saudi Aramco | Construction of AIOC at CDC, Dhahran**

Wjeen International Co. | Jeddah, Saudi Arabia | July 2023 - Present

- Spearheading all project management aspects for the Engineering, Procurement, and Construction (EPC) of the critical Artificial Intelligence Operation Center (AIOC) at Saudi Aramco's corporate data center in Dhahran.
- Accountable for the entire project lifecycle, encompassing scope definition, detailed schedule development and monitoring, rigorous budget control, proactive risk management, and ensuring adherence to stringent Saudi Aramco project standards and specifications.
- Leading and coordinating a multi-disciplinary project team, including direct management of Wjeen's internal resources and oversight of subcontracted packages (e.g., engineering by WorleyParsons, HVAC, Fire Fighting/Alarm, Audio Visual, etc.).
- Serving as the primary point of contact and maintaining strong communication with Saudi Aramco stakeholders, ensuring alignment on project objectives, progress, and any potential challenges.
- Driving project execution to achieve on-time and within-budget completion, while maintaining the highest standards of quality and safety.
- Implementing and enforcing robust project management processes and controls to track progress, manage changes effectively, and mitigate potential delays.

### **General Manager**

Property Care Contracting Co. | Khartoum, Sudan | Jan. 2018 - May 2023

- Led all operational aspects of a structural rehabilitation and interior design firm, overseeing a diverse portfolio of projects.
- Developed and implemented the company's strategic direction, encompassing business development, marketing, operations, and finance.
- Managed a multi-functional team, ensuring seamless project execution, high-quality workmanship, and client satisfaction.
- Cultivated and maintained strong relationships with clients, subcontractors, and suppliers, building long-term partnerships.
- Ensured compliance with all relevant regulations and safety standards.

### **Project Manager - DP World & DEWA | Construction of 132/11kV Electrical Substations at JAFZA**

Sahara AL-Emarat International Co. | Dubai, United Arab Emirates | Oct. 2015 - Dec. 2017

- Successfully managed the civil construction of two critical DEWA 132/11KV substations (Shipment and Container) for DP World's Jebel Ali port expansion, a fast-track project essential to port operations.
- Led and coordinated all civil construction activities, ensuring on-time and within-budget completion despite the challenging, fast-track environment.
- Collaborated effectively with the electro-mechanical contractor and project consultant, fostering strong relationships that facilitated seamless project execution.
- Leveraged DEWA approval and QA/QC expertise to ensure full compliance with DEWA standards.

## **Project Engineer - Lukoil | Engineering Phase of 90km Water, Gas & LPG Pipeline EPC Project, Basra, Iraq**

Verta-Tel SRL | Bucharest, Romania | Feb. 2015 - Aug. 2015

- Contributed to the engineering phase of a 90km water, gas, and LPG pipeline EPC project in Basra, Iraq.
- Facilitated communication and data exchange between the ground and design teams, ensuring project continuity.
- Participated in technical discussions to optimize design solutions, leveraging site knowledge and project requirements.

## **Project Manager - Saudi Aramco | Tank Farm Maintenance Project at Riyadh Refinery**

Arabian Fal Holding | Riyadh, Saudi Arabia | Jan. 2014 - Jan. 2015

- Transformed a challenged tank maintenance project at the Riyadh Refinery (Saudi Aramco) into a model of efficiency and client satisfaction under a complex long-form contract.
- Unified and motivated a diverse project team, resulting in improved morale, increased productivity, and seamless project execution.
- Optimized tank farm logistics, significantly boosting project profitability by increasing monthly revenue from SAR 300,000 to over SAR 1 million.
- Successfully managed participation in the Riyadh Refinery 2014 shutdown, achieving zero safety incidents and earning client commendation.
- Achieved a 98% compliance rating in a Saudi Aramco audit, demonstrating a strong commitment to quality and implementing a robust project management system.

## **Civil Engineer**

Sudanese Construction & Oil Services - Ministry of Oil | Khartoum, Sudan | Sep. 2011 - Dec. 2013

- Managed the bidding process for major refinery, pump station, and pipeline projects, including ITB development, proposal evaluation, and contract award recommendations.
- Oversaw contractor performance, ensuring adherence to quality, timelines, and contract terms, contributing to the successful completion of key projects.
- Represented the Ministry of Oil in the engineering phase of the Madani Terminal Station and 220km pipeline project, ensuring alignment with project objectives.
- Participated in the construction oversight of the Balela - Hadeeda 150km crude oil pipeline, gaining valuable experience in contractor management and field supervision.
- Contributed to the feasibility study for the Ariab Water Treatment Station and 170km pipeline, supporting project planning.
