PROFESSIONALEXPERIENCE

ASAS ALMOHILEB SAUDI ARABIA

Position: HSE Manager

CLINT: Neom

Duration: Sep 2024 till date

Project: The Line Mega Batching and Crusher Plant Project Neom.

ROLES AND RESPONSIBILITIES

Roles and Responsibilities:

1. Health, Safety, and Environmental Compliance:

Ensure adherence to all local, national, and international HSE laws, regulations, and standards. Monitor and ensure the organization's operations comply with relevant health, safety, and environmental regulations. Develop, review, and update HSE policies, procedures, and programs to maintain compliance and improve overall safety standards.

2. Risk Assessment and Hazard Identification:

Conduct regular risk assessments and safety audits to identify potential hazards. Lead and manage hazard identification and risk assessment programs across the organization. Recommend corrective actions and improvements to mitigate risks.

3. Safety Training and Awareness:

Design and implement HSE training programs to promote awareness and ensure employees are knowledgeable about safety protocols. Provide guidance and training to employees on safe work practices, emergency procedures, and environmental regulations. Conduct safety drills and exercises to ensure preparedness for emergencies.

4. Incident Reporting and Investigation:

Oversee the reporting, investigation, and documentation of workplace accidents, near misses, and safety violations.

Investigate incidents and accidents to identify root causes and implement corrective and preventive actions. Prepare and submit incident reports to regulatory authorities when required.

5. Emergency Response and Preparedness:

Develop, implement, and continuously improve emergency response plans and procedures. Ensure the availability and readiness of emergency response equipment, such as first aid kits and firefighting tools. Lead emergency response drills and training for employees.

6. Environmental Management:

Ensure the organization complies with environmental regulations and sustainability practices. Monitor and manage waste disposal, energy consumption, and environmental impacts. Promote sustainability initiatives to reduce the organization's environmental footprint.

7. HSE Reporting and Documentation:

Maintain accurate HSE records, including incident reports, safety audits, and training records. Prepare and present regular HSE performance reports to senior management. Ensure all necessary documentation for regulatory compliance is up-to-date and accessible.

8. Continuous Improvement:

Identify opportunities for continuous improvement in HSE practices and policies. Stay updated on the latest industry trends, regulations, and best practices.

Provide recommendations for new initiatives to enhance health, safety, and environmental performance.

9. Leadership and Team Collaboration

Lead and manage the HSE team, providing mentorship and support. Foster a safety culture by encouraging open communication and active participation from all levels of staff. Collaborate with other departments to integrate HSE objectives into overall business operations.

10. Audit and Inspection:

Conduct regular safety audits and inspections of the workplace and facilities. Monitor and evaluate the performance of safety programs, making adjustments as necessary. Coordinate external audits by regulatory bodies and ensure corrective actions are taken promptly.
