RESPONSIBILITIES

Drafting & Design: Creating detailed technical drawings, plans, and blueprints using computer-aided design (CAD) software. This involves accurately translating engineering sketches, specifications, and calculations into visual representations. Import & export point, creating surface & Alignments, making profiles, cut & fill calculations for stockpiles and Typical Sections with complete Layout settings using Civil 3D.

Site Survey Data: Conducting site surveys to gather data on existing conditions, such as topography, dimensions, and features. They may use surveying equipment to take precise measurements and assess the terrain. Making complete data for surveyors like Coordinates and elevations and multiple details demand that requested.

Shop Drawings: Making all kinds of shop drawings like detailed plans for Civil, Infrastructure, Culverts Electrical, and Stormwater, according to ministry standards and requirements.

As-built Drawings: Make all kinds of As-Built drawings with the following as-built data and submission procedure for handing over the project after completion and making revisions and modifications to drawings as necessary based on feedback and changes in project requirements.

Interpreting Design Requirements: Understanding design requirements and converting them into precise drawings with appropriate dimensions, scales, and annotations.

Collaboration: Collaborating with engineers, architects, and other professionals to ensure drawings meet project requirements and specifications.

Documentation: Maintaining all Shop Drawings, Built Drawings, and documentation related to drawings, including version control, filing systems, and project records. Log maintaining with variation dates. Daily updating the work progress plan according to the site work progress

Meeting Deadlines: Managing time effectively to meet project deadlines and deliver drawings within specified timeframes. And always be punctual to finish the work within a given time frame.

Continuous Learning: Staying updated on the latest features, techniques, and advancements in AutoCAD & Civil 3D software to enhance productivity and efficiency.

SKILLS

- Auto-CAD
- Civil 3D
- MS Office
- MS Project
- Trimble Business
- Google earth pro and Nitro pro & KMZ Creation
- Windows & Software's installation E-Mail & Printing Plotting
