Summary

Cybersecurity graduate with a strong focus on offensive security and penetration testing. Experienced in simulating cyber attacks, conducting vulnerability assessments, and using red team tools like Kali Linux, Burp Suite, and Metasploit. Proven ability to identify and exploit security weaknesses in controlled environments. Holding industry-recognized certifications such as eJPT and CEH, and continuously developing skills in ethical hacking to stay ahead of emerging threats.

Education

Bachelor's, Cybersecurity, University of Jeddah 2020 – 2024

Experience

Cybersecurity Intern, Fortinet Jun 2024 – Sep 2024

- Conducted internal penetration testing and threat simulation exercises using Kali Linux
- Practiced offensive security techniques in a lab setup using tools like Nmap, Burp Suite, and Metasploit
- Exploited system vulnerabilities in simulated environments and documented findings
- Gained exposure to blue vs red teaming workflows, assisting in coordinated red team exercises
- Developed phishing scenarios to simulate social engineering attacks (aligned with Fortinet awareness training)

Certificates

- Junior Penetration Tester - eJPTv2
- Certified Ethical Hacker - CEH
- Certified Network Defender - CND
- INE Certified Cloud Associate - ICCA

Skills

Offensive Security

Kali Linux, Metasploit, Burp Suite, Nmap, Hydra

Network Scanning & Exploitation

Wireshark, Netcat, Nikto

Social Engineering & Phishing Simulation

Web App Testing

OWASP Top 10, SQLi, XSS, LFI/RFI

Red Team Operations

Vulnerability Assessment & Reporting
