## **Roles & Job Responsibilities:**

### **Civil Project Engineer**

- ▶ Ensure strict compliance with approved construction procedures, contract documents, specifications, and project standards across all phases.
- ▶ Exhibit expertise in civil, architectural, and structural engineering disciplines, coordinating cross-functional teams for comprehensive project management.
- ▶ Oversee Demolition, Site Clearance, Welfare Facilities, Dust Control, and Earthworks, ensuring compliance with environmental, HSE, and quality standards.
- ▶ Collaborate with logistics, environmental, survey, safety, and quality teams to ensure seamless project execution and compliance with standards.
- ▶ Assisted the Project Manager in implementing cost control measures and supported the Quantity Surveying (QS) team in preparing and reviewing invoices to ensure accurate billing and financial management.
- ▶ Collaborate closely with clients and consultants to ensure efficient execution of civil works and smooth coordination of all project activities.
- ▶ Prepare detailed daily reports documenting observations, project progress, and challenges, ensuring effective communication and informed decision-making.
- ▶ Conduct regular site inspections and surveys to monitor progress, identify deviations, and implement corrective actions to maintain timelines and quality.
- ▶ Supervise and mentor site engineers, supervisors, and foremen to uphold high standards of project quality, efficiency, and safety. Analyze and propose optimal methodologies and solutions to the project manager, with a strong focus on health, safety, and environmental considerations.
- ▶ Foster a safety-conscious culture on site, ensuring strict adherence to health and safety regulations, conducting toolbox talks, and implementing preventive risk measures.

### **Senior Site Engineer / Site Engineer – Civil**

- ▶ Ensure strict compliance with approved construction drawings, contract documents, specifications, and project standards across all phases of the project.
- ▶ Manage concrete works, including the casting of various structures such as abutments, piers, columns, back walls, box girders, and duct banks, maintaining high-quality standards.
- ▶ Supervise a wide range of construction activities, including steel fabrication, shuttering (Doka), scaffolding, backfilling of MSE walls, façade installation, and the setup of essential infrastructural networks (e.g., foul sewer, stormwater, potable water, TSE, telecom, streetlights).
- ▶ Conduct frequent site inspections and surveys to track progress, identify discrepancies from plans, and implement corrective actions to ensure timelines and quality standards are met.
- ▶ Oversee the monitoring, training, and management of supervisors and foremen to ensure the project meets the required quality, efficiency, and safety benchmarks.
- ▶ Supervise roadworks operations, including excavation, utilities installation, subgrade, and base preparation, ensuring alignment with project specifications and standards.
- ▶ Collaborate with Electrical and Mechanical teams to ensure the smooth integration of civil works and coordination of multidisciplinary project activities.
- ▶ Prepare detailed daily reports documenting project observations, progress, and any encountered challenges, fostering effective communication and decision making across all stakeholders.
