## SUMMARY

---

Civil Engineer with experience in project execution and supervision. Contributed to major developments including the Third Saudi Expansion of Makkah's Holy Mosque and the Sadayem Project (417 villas). Combines technical expertise in project management, quantity surveying, and specification compliance with exceptional coordination skills to resolve on-site challenges. Contributed to the successful delivery of high-quality projects on schedule through meticulous error reduction and effective stakeholder collaboration.

## EDUCATION

---

Bachelor's degree of Civil Engineering | Taif University | 2016 - 2021

## WORK EXPERINCE

---

### Civil Engineer - Ahmed Al Mousa Engineering Consultants | January 2025 - Current

- Conduct regular site visits to review and inspect completed works, ensuring conformity with approved drawings, specifications, quality standards, and safety regulations.
- Review and inspect material submittals provided by the contractor, and perform on-site inspections to verify compliance with technical specifications and project requirements.
- Identify non-conformities and potential risks during execution, prepare technical reports outlining observations, and recommend corrective actions to maintain project compliance and progress.
- Review and process monthly payment applications based on actual work progress, verifying quantities and completed items on site.

### Civil Engineer - Al Hashemiah Contracting Co LLC - HATCO | December 2022 - December 2024

- Ensure that all construction activities are executed accurately in accordance with approved plans and technical specifications.
- Review engineering drawings and specifications, and calculate construction quantities to ensure accurate execution of works.
- Proactively contribute to on-site health and safety efforts and ensure compliance with safety protocols in coordination with the Project Safety Representatives.
- Coordinate effectively with the consultant's representatives, participate in technical meetings, and help resolve issues that may impact workflow continuity and project timelines.
