Home: Al Qayrawan, Tunisia

Key skills

- CAD/Civil 3D
- Tekla Structure
- PROCORE
- MS Project
- MO: Excel / Word / PP
- Primavera
- Construction plans
- Design layout
- Technical reports
- Design specifications
- Quantity surveying
- Budget/Cost control
- SVI, Claims
- FIDIC, Contract Amendments

Languages

- French-Fluent
- English-Fluent
- Arabic- Native

Education

Bachelor Civil Engineer from National school of engineering, ENIG Tunisia
Graduated 2014

Summary

Experienced Bachelor-qualified Civil Engineer with around 10 years' experience, primarily in mining infrastructure, as well as industrial and commercial buildings. I've developed strong capabilities in scheduling, cost control, construction budgeting, and project estimation, grounded in the technical aspects of engineering design and material specifications.

Career history

Sr Project Engineer / Scheduler

Island Site Development, The Bahamas / USA

Sep 2024 – Present

Provided engineering expertise across the landside scope of works, including front-of-house areas such as food halls, restaurants, and restrooms, as well as back-of-house facilities including food storage, RO plant, water treatment and reclaim tanks. The project covered a 20-acre site with a budget of USD 123 million, delivered for Carnival Corporation's destination development in collaboration with STANTEC as the design consultant. Responsibilities listed as below:

- Managing PROCORE submittals: RFI, design, reports, Logistic & HSSE plans
- Lead and organize OAC weekly meetings
- Produce and Maintain schedule (including cashflow & Manpower) on Primavera
- Coordination of sub-contractors on site
- Management and procurement of construction materials

Contract Administrator / Site Engineer

Rider Levett Bucknall, South Africa / DR Congo

Jun 2023 – Dec 2023

Collaborated with DRA Global on-site and in-office for Ivanhoe Mines' copper project, developing six underground mining packages (USD 60M) covering raise boreholes, drilling, and infrastructure. Responsibilities listed below:

- Checking and verifying Subcontractor's re-measurement submissions: SVI, Claims, Change orders
- Checking compliance with measurement conventions, contractual entitlement and JV arrangements
- Preparing monthly IPC's and Client deliveries: Cashflow update, Contract amendments updates & approval

Project Engineer / Field Engineer

EDILE Construction, DR Congo

Jun 2017 – Sep 2024

Key Tasks:

- Performs quantity estimates and monitors quantities completed on a weekly basis to generate monthly billings to the Owner
- Development and maintenance of construction schedule including reporting and monitoring activities
- Management of the design process including optioneering, stakeholder engagement, technical input, contractor management and procurement
- Engaging with and coordinating multiple stakeholders during the execution of the works including Operations, EPC organizations, contractors, government organizations

Highlighted Projects involved in:

- Civil Work package at the KCSA Mine phase 3 Project, Kamoia, Kolwezi: DRA Global 3.8M USD
- Kamoia – Kakula Mine Phase 3 project Building package: DRA Global 2M USD
- Kamoia copper Mine Smelter project Civil works: NERIN Consult 3M USD
- Church of Jesus Christ of latter-day saints, Lubumbashi DRC: Westland construction, USA 20M USD
- Trafigura Logistics Lubumbashi terminal, Lubumbashi DRC: Trafigura 1.2M USD
- INPP Vocational training facilities, Lubumbashi DRC: DNC, Japan 8M USD
- Castel Africa: Construction of storage facilities for new production line, Lubumbashi DRC 5M USD

Jr Site Engineer

ETEP, Tunisia

Jul 2014 – Dec 2016

Key Tasks:

- Carrying out preparation of plans, permits estimates, reports, forecasts and material take offs.
- Works with the project team to develop unit man-hour and pricing data for work activities and monitors craft productivity
- Ensuring quality of completed tasks/performing quality control process

Project involved in:

- Trans-Maghreb Highway Road Project, South Tunisia: Construction of RC slab bridges: Rebar & shutter form, Drainage system, Precast concrete production (sewer holes, central barriers...)

Interests

- Team work / Negotiation's skills / Architecture
