Summary

Civil Engineer with extensive experience in architectural design, modeling, quantity surveying, and project supervision. Skilled in using GIS, AutoCAD, Revit, and Civil 3D. Proven ability to manage construction projects, prepare excavation plans, and coordinate with multidisciplinary teams. Seeking to contribute technical expertise and problem-solving abilities in a growth-oriented engineering environment.

Work Experience

Civil Engineering Consultant | Al-Birk Municipality, Saudi Arabia | 2023 – Present

- Conducted construction studies and supervised building projects.
- Calculated costs and quantities for construction materials.
- Utilized GIS for spatial data management and analysis.

Sales Representative | Almarai Company, Jordan | 2022 – 2023

- Managed customer orders and delivery schedules.
- Handled high volumes of incoming calls and coordinated logistics.
- Prepared daily work schedules for operations.

Site Supervisor | Al Bawadi International Company, Jordan | 2021 – 2022

- Supervised structural model implementations.
- Prepared excavation plans and shop drawings using Revit and Civil 3D.
- Coordinated schedules across departments for smooth workflow.

Education

Bachelor's Degree in Civil Engineering | Al al-Bayt University, Jordan | 2015 – 2022

Certifications & Courses

- Engineering Supervision Course – Engineers Training Center (30 hours), 2022
- Quantity Surveying and Specification (15 hours), 2022
- AutoCAD
- GIS Specialist – Geographic Information Systems
- Microsoft Office Applications
- Critical Thinking & Debate – US Embassy in Jordan

Skills

- Architectural Design & Drafting
- Quantity Surveying
- GIS & Spatial Analysis
- Problem Solving & Troubleshooting
- Team Collaboration & Communication
- Time management and organization
- Ensuring that works comply with structural design regulations and architects' plans

Technical Tools

- AutoCAD
- Revit
- Civil 3D
- GIS (ArcGIS, QGIS)
- MS Office (Excel, Word, PowerPoint)

Languages

- English: Fluent
- Arabic: Native
