SUMMARY

Certified Lifting Operations Manager and LEEA Appointed Person with over 14 years of experience in the construction and general contracting sector. Highly skilled in planning, supervising, and executing critical and high-risk lifting operations using mobile cranes, crawler cranes, gantry cranes, overhead cranes, and all types of lifting machinery. Possesses extensive expertise in preparing detailed lifting plans, conducting thorough risk assessments, and ensuring full compliance with LEEA guidelines and international safety standards. Demonstrates strong leadership in managing lifting teams, coordinating with engineering, health, safety, and environmental departments to guarantee safe, efficient, and timely execution of lifting activities. Known for excellent communication, on-site decision-making, and commitment to safety and operational excellence.

Rigging Specialist with extensive experience in planning, inspecting, and executing complex rigging operations on major construction and industrial sites. Adept at performing Job Hazard Analysis (JHA), ensuring compliance with safety standards, and coordinating with crane operators and site supervisors to guarantee safe and efficient lifting procedures. Strong knowledge of rigging gear inspection, load calculations, and ground conditions for heavy lifts. experience in overseeing heavy lifting operations and managing crane and rigging crews on large-scale construction projects. Skilled in enforcing safety standards, ensuring compliance with technical specifications

WORK EXPERIENCE

Lifting Operations Manager

2024 - Present -

El Seif Engineering & Contracting Co.-Project: Spine 183 Factory & Yard THE LINE, NEOM

📍 Neom

Prepare detailed lifting plans based on on-site verifications using AutoCAD, and submit full lifting plan packages with all required documentation for client approval, in line with the company's lifting procedures.

Ensure that all lifting equipment and appliances used by the team are certified by a third party and color-coded as per the current site color coding system.

Guarantee the safe and competent execution of all lifting operations in accordance with approved lifting plans.

Supervise daily lifting activities and develop customized lifting plans for each crane based on the excavation and site layout.

Manage day-to-day operations of the lifting team and ensure compliance with safety protocols throughout all lifting tasks.

Prepare task-specific risk assessments for each lifting operation to identify hazards and determine appropriate controls.

Define clear scopes of work for all team members and assign responsibilities based on their qualifications and job roles.

Select suitable cranes and lifting equipment for each job scope, ensuring optimal capacity and configuration for the task.

Develop and implement procedures for the safe execution of lifting operations at site, from planning to execution stages.

Organize and conduct training sessions for lifting team members and operators to enhance their technical skills and safety awareness.

Promote safe handling and lifting practices in alignment with company HSE policies and international safety standards.

Continuously assess, plan, and improve lifting execution strategies to align with company and client standards.

Verify lifting equipment specifications based on the scope of work to ensure compatibility and capacity adequacy.

Maintain a structured and systematic approach to managing lifting operations across the project.

Actively participate in the coaching, mentoring, and training of rigging supervisors, foremen, and riggers.

Contribute to internal lifting audits, incident investigations, and the implementation of corrective actions.

Lead the on-site lifting teams, ensuring all operations are executed with maximum safety, awareness of potential hazards, and application of appropriate control measures.

Lifting and Rigging Specialist / Precast Manger

2018 - 2024

Al-Fouzan General Contracting

📍 Construction of Apartment Building Project Phase-2 (097-C74R). Royal Commission

Royal Commission Project – Jubail, KSA

Residential Buildings (12 Buildings – 6 Floors Each)

Led and supervised all rigging and lifting operations for a high-scale precast residential project under the Royal Commission in Jubail. Oversaw the erection and installation of 12 multi-storey buildings (G+5) using heavy-duty cranes and advanced rigging methods to ensure safe, precise, and efficient component placement.

Key Responsibilities:

Fully managed lifting activities for all precast structural elements (walls, columns, beams, slabs, and stairs), including coordination of tower cranes, mobile cranes, and rigging crews.

Developed and executed Critical Lifting Plans (CLPs) for complex and high-risk lifts, ensuring full compliance with LEEA standards and project-specific safety requirements.

Conducted daily pre-lift inspections, rigging equipment checks, and pre-task briefings with riggers and crane operators.

Supervised the installation sequencing of precast elements, ensuring safe maneuvering and accurate alignment.

Implemented strict HSE procedures on-site, achieving zero incidents during lifting operations throughout the project.

Coordinated between structural engineers, site management, and crane teams to align lifting activities with construction progress.

Managed documentation for all lifting activities including risk assessments, JHAs, permits to work, and daily reports.

Oversaw general site execution of insulation works, concrete repair, epoxy works, and finishing related to precast components.

Lifting Manger / Site Engineer

May 2015 - Apr 2018

Al-Fouzan General Contracting

📍 Al-Madina Al-Munawwarah Project Dar Alhijrah

Specific Duties and Responsibilities/Scope of Work

All external and internal insulation work , Bridge precast concrete, finishing work, Concrete treatment works, repair work, repair and epoxy finishing works in a tunnel of 7 km length and 8 towers
