Experience

- **Cwc** 2015 - 2018
Civil engineer + traffic safety engineer
I worked in the Riyadh Landfills Project, a maintenance project affiliated with the National Water Company, where I supervise and follow up on road maintenance work and ensure that they are implemented in accordance with standard specifications and implement all items, such as in the technical assessment, delivery of the consultant, and follow up on the tests in the laboratory and ensure their success.
I also worked as a traffic safety engineer, such as implementing traffic diversions in work areas, training workers to carry out their work safely, ensuring the presence of safety means in the project, and preparing reports on everything related to safety and submitting them to the concerned authorities.
- **Al shallawy** 2020 - 2022
Civil engineer + traffic safety engineer
Civil engineer position in the field of roads
I worked in the project of duplicating the Al-Rain-Bisha Road, phase five and six, as a site engineer, following up on all project work, including implementing all items, such as the technical measurement, ensuring their conformity with the design drawings, handing over the consultant, solving all technical and labor problems, always communicating with the concerned authorities, and making periodic reports and submitting them to the project manager.
I worked as a traffic safety engineer after passing the traffic and safety engineer accreditation test from the Ministry of Transport, where I worked on implementing traffic diversions in work areas on the road, following up on the installation of warning and advisory road signs as per the specifications, and training workers in the project to carry out their work safely, and making reports on traffic and professional accidents and submitting them to the authorities. Competent
