ABOUT ME

I have 8 years of experience in the Saudi Electricity Company, which opened the way for me in the field of electrical energy in all its stages, and my goal is to use this experience to move forward.

WORK EXPERIENCE

● UNDERGROUND CABLE MAINTENANCE TECHNICIAN, Saudi Electricity Company, JEDDAH

- Installation, maintenance and repair of cable systems and power transmission components
- Inspection of the cable path and follow-up of drilling and extension works
- Providing assistance to electrical engineers in solving problems
- Ensure that emergency operations are responded to as quickly as possible to reduce periods of power outages

● OVERHEAD LINES MAINTENANCE TECHNICIAN, Saudi Electricity Company, JEDDAH

- Installation, inspection and maintenance of overhead network equipment and devices
- Control of feeders and electrical power supplies
- Climbing the aerial towers and wooden poles for examination, maintenance and cleaning of electrical insulators.

● Electrical Technician King Abdulaziz International Airport

- Distribution Station Maintenance: Performed maintenance and repairs on medium-voltage distribution stations to ensure reliable power distribution.
- Cable Inspection: Inspected and maintained medium-voltage cables to ensure safety and operational efficiency.
- Troubleshooting: Handled and resolved emergency faults in medium-voltage systems to maintain continuous electrical supply.
