Summary

Results-driven Senior Civil Engineer with extensive experience leading large-scale infrastructure projects, including NEOM's Spine Infrastructure and the construction of fuel station chains in joint ventures with Aramco and TotalEnergies. Proven track record in executing complex construction operations in collaboration with global and local stakeholders. Skilled in project planning, procurement, and on-site coordination, with a strong focus on safety, quality, and productivity. Recognized for delivering impactful outcomes, maintaining a zero-accident safety record, and successfully managing mega contracts from initiation to completion.

Experience

Alaa International Contracting Co (AICCO), AFI Group – Jeddah, Saudi Arabia **Construction Site Manager | July 2024 – Present**

Project: Construction of 6 Fuel Stations Chain ,JV Aramco & Total Energies

Site Manager: | July 2024 – Present

Main Contractor: AICCO | **Client:** JV Aramco & Total Energies (TMC) SAR 60M

- Oversaw complete project lifecycle from demolition to handover, ensuring alignment with scope, cost, and timelines.
- Ensured strict adherence to Aramco and TotalEnergies' HSE, standard and brand norms , quality, and environmental standards.
- Managed procurement, logistics, equipment, and reported progress and risks to stakeholders.
- Supervised submittals, RFIs, VO/change orders; managed fuel system installations and dispenser setups.
- Developed execution plans, resource schedules, and coordinated with clients and consultants.
- Led cross-functional teams and coordinated MEP works, including firefighting and sewage systems.
- Promoted a culture of safety, accountability, and problem-solving across the site.

SAMA Construction for Trading and Contracting – Tabuk Region, Saudi Arabia

Project: NEOM Spine Infrastructure – SAR 180M

Project Engineer | Feb 2024 – July 2024

Main Contractor: SAMA Construction | **Consultant:** BECHTEL

- Delivered project milestones on schedule and within budget, maintaining a 100% on-time delivery rate.
 - Increased on-site productivity by 30% through implementation of streamlined workflows and process improvements.
 - Applied lean construction methods to minimize waste, reducing project duration and costs by 25%.
 - Established a comprehensive documentation system, improving transparency and project efficiency by 40%.
 - Enforced effective cost control strategies, reducing overall project expenses by 15% without impacting quality.
 - Strengthened coordination with all stakeholders, resulting in a 25% increase in satisfaction metrics.
 - Conducted site inspections to ensure compliance with safety standards and design specifications, reducing rework by 20%.
-

Project: NEOM Spine Infrastructure – SAR 140M

Site Engineer | Feb 2023 – Feb 2024

Main Contractor: SAMA Construction | Consultant: BECHTEL

- Developed and executed detailed project schedules and construction plans in line with project objectives.
- Coordinated all on-site activities, ensuring alignment with scope, cost, and quality requirements.
- Enhanced site management practices, increasing productivity by 25% and minimizing delays.
- Prepared daily progress reports, two-week lookahead plans, and tracked project resources and budgets.
- Managed technical submittals, RFIs, shop drawings, and as-built documentation for smooth project execution.
- Conducted regular site inspections to monitor compliance with safety, sanitation, and design standards.
- Collaborated closely with subcontractors and field staff to resolve technical issues and keep the project on track.

TSC Contracting company

Riyadh, SA

Site Engineer

05/2021

Consultant: Quartz Architect

Project Name : Residential Project 5450m2

- Oversee all construction, maintenance, and operations activities at project sites to ensure efficient and effective project execution.
- Maintained and reviewed all engineering documents in accordance with global procedures, Coordinated with engineering teams and recommended materials for processes.
- Supervise daily construction activities to ensure compliance with project plans and specifications.
- Conduct regular site inspections to ensure compliance with design specifications and regulatory standards.

Experience

TSC Contracting company

Riyadh, SA

Civil Engineer intern

01/2021

- Assisted engineers and engineering technicians with the design, quality, development, integration, Shop drawing, Quantity Surveying.

Education

Jordan University of Science and Technology

Civil Engineer ABET Accredited

05/2021

Certification

Project Management Professional PMP — Project Management Institute

Construction Management Specialization — Columbia University

OSHA Construction — The Occupational Safety and Health Administration

Skills

AutoCAD Revit Primavera P6 Microsoft Office Construction Management
