OBJECTIVE

Project Engineer with 3 years of focused experience in safety-critical and industrial environments. Skilled in managing the design, installation, and execution of electrical systems with a strong emphasis on HSE compliance and risk management. Proven ability to lead infrastructure projects, coordinate with multidisciplinary teams, and deliver safe, efficient, and cost-effective solutions. **Certified in PMP & NEBOSH**, and committed to continuous improvement in safety, system reliability, and operational excellence.

EXPERIENCE

Sendan International Company | Saudi Aramco Projects (Aramco Approved)

Project Engineer | 02/2024 – 03/2025

- Working on a project to upgrade fire protection and industrial drainage systems.
- Coordinating with the planning team to track both anticipated and realized progress to meet project milestones.
- Maintaining communication and coordination with the client, designer, and vendors.
- Preparing project documentation, including progress reports and technical specifications.

Emirate of Asir Region | Volunteer Program

Electrical Engineer | 02/2024 – 04/2024

- Served as an administrative coordinator for two teams in the Ajaweed program.
- Led efforts to motivate and visit 20 centers in Abha, organizing initiatives to serve the community.
- Supported underprivileged families by coordinating with responsible organizations to provide necessary assistance and resources.

TAWAL | Telecommunications Infrastructure

Project Engineer | 11/2022 – 11/2023

- Coordinated with field technicians from the central headquarters to troubleshoot and resolve power-related faults in STC towers across the Kingdom.
- Ensured efficient communication between the main center and on-ground teams to restore operations promptly.
- Maintained accurate records of issues reported and solutions implemented to improve future response strategies.

TRAINING

Saudi Electricity Company | Distribution Engineering Department

Summer Training | 06/2021 – 08/2021

- Trained with the Distribution Engineering Department.
- Gained hands-on experience in electrical distribution systems, including transformers and underground cables.
- Prepared maintenance plans and periodic reports to support operational efficiency.
- Conducted field inspections and ensured adherence to safety and quality standards.

COURSES & CERTIFICATES

- Project Management Professional Certificate (PMP) | Project Management Institute (PMI) | (2025)
- Building Information Modeling (Revit) | 40 Hours | Integrated Learning Training Center (2024)
- Electrical Systems Design (Power Distribution) | 40 Hours | Integrated Learning Training Center (2024)
- Lighting Systems Design | 25 Hours | Integrated Learning Training Center (2024)
- NEBOSH Professional Certificate | Accredited Certificate (2023)
- OSHA in Occupational Safety | 30 Hours | Al Maknan Training Center (2022)

EDUCATION

King Khalid University | 2022

- Bachelor of Electrical Engineering | **GPA: Very Good**

SKILLS

- Team Collaboration and Leadership
- Problem Solving and Critical Thinking
- Proficiency in Microsoft Office
- Emotional Intelligence
