LEVANT CONSTRUCTION – NADEEM GROUP – CONTRACTING – PROJECT ENGINEER

Baghdad, Iraq

Infrastructure works: Roads & Bridges for the Ministry of Construction, Housing, Municipalities and Public Works for the Republic of Iraq.

Scope of work:

Full Rehabilitation of Southern, Eastern and Northern entrances of Baghdad by widening of existing double carriageway from 2 to 4-5 lanes along with the creation of service roads, shoulders, medians, pedestrian bridges and overpasses.

- Total length of 30km – with an average corridor width of 80m – 100m
- 2 concrete bridges over waterways with 8 spans, 24m precast and pre-stressed beams each.
- 11 concrete overpasses, 20 spans, 24m precast and pre-stressed beams each.
- 15 concrete pedestrian bridges.
- 970 bored piles of 1.5m Diameter for all bridges.
- 5,000,000m² of milling and asphalt laying (15cm base course, 7cm binder and 5cm wearing course with polymer).
- 3m wide concrete shoulders with 20cm thickness for main and service roads.
- Storm water drainage system with gutters, catch pits, single and double box culverts, pipe culverts and outfalls.
- Precast concrete barrier and guard rail for main road and service road medians along the whole carriageway.
- Full road furniture

Key responsibilities and roles:

- Collaborate with team personnel to resolve outstanding issues and proactively plan for upcoming tasks.
- Organize and lead meetings with client representative to solve rising and lingering matters.
- Create, manage and upkeep project database, planning reports, bar bending schedules, drawings, forms and subsequent paperwork, payment certificates, progress reports and monthly budgets.
- Coordinate with suppliers to receive material according to required specifications and on time.
- Overlook and devise control sheets to coordinate with operators of asphalt plant, batching plant to ensure mix designs and results are up to required standards and specifications.
- Control all material testing at concrete and asphalt plants along with field testing with quality control team and client representative at all times.
- Supervise, oversee and control all ongoing tasks and activities on site with various team members.
- Follow up with mechanical department and provide necessary machinery and fleet for various site teams.
- Monitor and manage material inventory in coordination with storekeeper to ensure uninterrupted workflow.
- Plan and arrange road blockages and diversions with safety officers and government road authorities on daily basis for ongoing activities.
- Prepare and share dense work programs with team leaders on daily basis to ensure alignment in aim and vision.
- Schedule and coordinate project phases to ensure timely completion and alignment with milestones.
- Prepare costing sheets and comparison tables for BOQ items to ensure alignment with cost.
- Coordinate with various government departments and agencies in order to remove, divert or relocate existing infrastructure (communication networks, underground and overhead electrical distribution systems, main water lines, sewer and stormwater mains).
- Collaborate with subcontractors to integrate efforts and facilitate smoother job completion.
