## SUMMARY

I have 5 years of experience in the construction sector including 3-year experience in KSA, I have developed strong expertise in Quality Control (QC) and project execution for road construction, Airport Expansion and housing society projects. In my roles as QC Engineer, QC Inspector, and Site Engineer, I have been responsible for ensuring compliance with local and international standards, monitoring quality processes, and performing inspections to ensure the highest standards of quality are maintained.

I am well-versed in implementing and adhering to the Code, as well as local regulatory requirements for construction projects in the Kingdom of Saudi Arabia. I possess in-depth knowledge of construction materials, testing methods, quality documentation, and safety protocols.

I am driven by challenges and actively seek roles in dynamic, growth-oriented organizations. With a collaborative mindset, I work efficiently alongside senior management and project teams to ensure timely project completion while maintaining the highest standards of quality and safety.

**Designation :** QC Engineer  
**Project :** Dualization & Re-Carpeting of Old Bannu Road  
**Duration :** Nov 2021 – Aug 2022

### Professional Experience : 4

**Company :** Frontier Works Organization  
**Designation :** Site Engineer (Civil)  
**Project :** Thall MirAli Road  
**Duration :** May 2020 – Nov 2021

### Roles & Responsibilities:

- Develop, implement, and maintain Quality Assurance (QA) and Quality Control (QC) procedures, ensuring compliance with client specifications, international standards (e.g., ISO 9001), and local regulations (e.g., SBC).
- Prepare and manage Inspection Test Plans (ITPs), Method Statements, and Quality Control Procedures for construction activities.
- Oversee the inspection of all construction materials (e.g., concrete, steel, soil, asphalt) and ensure that they meet project specifications and quality standards.
- Conduct regular in-process inspections and ensure that quality tests are performed by approved third-party laboratories or on-site.
- Verify that the materials used comply with the approved mix designs, supplier certifications, and relevant standards.
- Identify non-conformances (NCRs) and document quality issues in real-time.
- Track corrective actions to address non-compliant work, ensuring they are promptly executed and preventing Occurrence.
- Collaborate with the project team to resolve quality issues and ensure compliance with project requirements
- Maintain comprehensive QA/QC documentation, including inspection reports, test results, and non-conformance records (NCRs).
- Produce daily/weekly/monthly QA/QC reports for project stakeholders, ensuring transparency and tracking progress.
- Prepare all required final documentation for project handover, including inspection approvals, test certificates, and compliance reports.
- Liaise with clients, consultants (e.g., Aramco, SABIC), and subcontractors to ensure all work aligns with quality standards.
- Facilitate quality meetings, addressing project challenges and ensuring that all stakeholders are aligned on quality expectations.
- Provide support to construction teams, ensuring they adhere to approved quality procedures and safety standards.
- Conduct training sessions for site staff on quality control procedures, ensuring they are well-versed in project-specific quality standards.
- Perform internal quality audits to assess adherence to established quality procedures and standards.
- Ensure that all quality checks are completed before final project handover.
- Prepare and submit all required handover documentation, including final inspection reports, as-built drawings, and certificates of compliance.
