Saudi Arabia, Riyadh | +966570131242 | o.mabyou@gmail.com

## SUMMARY

---

Civil engineer with more than 8 years of experience, proven expertise in managing a diverse range of projects, including buildings and large-scale roads and infrastructure projects, ensuring the highest quality standards in construction projects.

Skilled in quality assurance, site inspections, material testing, quality audits, and site management.

Known for exceptional problem-solving skills, a strong focus on safety, and a commitment to delivering high-quality outcomes.

capacity to uphold engineering standards and reliably finish projects that satisfy industry standards as well as client expectations.

## EXPERIENCES

---

### QC Engineer | JH CONSTRUCTION W.L.L | Qatar, Doha | Dec 2021 – May 2023

- Project Management, Risk Management, Regulatory Compliance Knowledge, Quality Management System (QMS) Proficiency, Stakeholder Engagement & Alignment, Digital Documentation and Record Management.

### QA/QC Engineer | TRI CONSTRUCT W.L.L | Qatar, Doha | Feb 2019 – Nov 2021

- Project Management, Risk Management, Regulatory Compliance Knowledge, Quality Management System (QMS) Proficiency, Stakeholder Engagement & Alignment, Digital Documentation and Record Management.

### Site Engineer, Structural Engineer | Brouj Consultancy | Sudan, Khartoum | Dec 2015 – Feb 2018

- Engineering consultancy, quality control, site supervision, quantity surveying and structural design.

## CERTIFICATIONS

---

- Saudi Council of Engineers Registration | Civil Engineering | Saudi Arabia, Riyadh | 2025
- MMUP/UPDA | Qatar, Doha | 2022
- Sudanese Engineering Council Registration | Civil Engineering | Sudan, Khartoum | 2017
- AutoCAD | engineering training center (University of Khartoum) | Sudan, Khartoum | 2014
- Plan Swift | engineering training center (University of Khartoum) | Sudan, Khartoum | 2014

## EDUCATION

---

Bachelor of Science (Honour's) Civil Engineering | University of Khartoum | Sudan, Khartoum | 2015

## COMPUTER SKILLS

---

AutoCAD | Staad Pro v8 | ETABS | Prota Structure | Plan Swift | MS Project | Microsoft Office

## SKILLS

---

Action Oriented | Collaborates | Communicates Effectively | Self Development | Situational Adaptability.

## LANGUAGES

---

Arabic | English

## ACHIEVEMENTS

---

### Roads and Infrastructure in Al Ebb & Leabaib, Package-5 DN099 P05:-

Client: Public Works Authority, Contractor: TRI CONSTRUCT W.L.L, Consultant: Keo International Consultants, Contract Price: 395 Million Qrs, Scope of Works: Earthworks, Surface Water Drainage Networks, Sewerage Networks, TSE Networks, Utilities (Wet & Dry) and Roads Works.

### Roads and Infrastructure in West Muaitheer Al Manaseer, Phase-1 DW002 P01:-

Client: Public Works Authority, Contractor: (NBHH), Consultant: Dar Al Handasa, Contract Price: 597 Million Qrs, Scope of Works: Scope of Works: Earthworks, Surface Water Drainage Networks, Sewerage Networks, TSE Networks, Utilities (Wet & Dry) and Roads Works.

## **JOB RESPONSIBILITIES**

---

### QAQC Engineering:

#### Responsibilities:

- Follow all relevant QAQC, policies, standard operating procedures, and instructions so that work is carried out in a controlled and consistent manner.
- Demonstrate compliance to the organization's values and ethics at all times to support the establishment of a value-driven culture within the organization.
- Verify methods of inspection, testing, and instrument calibration, to ensure, accurate traceability of measurement in support of Nesma & Partners best practices.
- Conduct regular quality surveillance on site, to ensure works are following as-built drawings, and to report any deviations to senior management.
- Monitor tests and examinations conducted by QC inspectors, to ensure accurate reporting of project status.
- Gather QAQC records (drawings, submittals, etc.) are properly managed and stored, to ensure the accessibility of relevant information.
- Liaise with consultant's representatives, to provide required documentation and tests performed, ensuring the accurate transfer of information.
- Ensure QAQC documentation is revised and up-to-date (version numbers, dates, status), including the appropriate disposal of obsolete documents, to ensure relevant information is readily available.
- Record and monitor as-built information daily, to ensure adjusted records.
- Participate in project management, by ensuring executed works are conducted as per drawings, project specifications, and material submittals.
- Contribute to quality Inspection and Test Plans (ITP), by ensuring they are implemented correctly and follow industry best practices.
- Address non-conformance reports, to ensure works that do not comply contractually are correctly and timely addressed.
- Maintain communication with the project team, superintendent, and subcontractors to identify deficiencies, punch list points, snags, and ensure adequate process capabilities to sustain information feedback.
- Contribute to the identification of opportunities for continuous improvement and sustainability of systems, processes and practices considering global standards, productivity improvement and cost reduction.
- Assist in the preparation of timely and accurate reports to meet department requirements, policies, and quality standards.

### Construction management:

#### Responsibilities:

- Supervise activities on-site, including monitoring progress, quality control, and adherence to safety regulations and building codes.
- Coordinate with architects, engineers, subcontractors, and suppliers to ensure smooth workflow and resolve any issues or conflicts that may arise.
- Manage the procurement, delivery, and storage of materials and equipment, ensuring adequate supply and timely delivery to support project requirements.
- Implement quality control measures to ensure that work meets project specifications, standards, and regulatory requirements.
- Provide technical support and guidance to workers and subcontractors, addressing any technical challenges or queries related to operational activities.
- Maintain accurate and up-to-date documentation of operational activities, including progress reports, site records, and as-built drawings, to track project milestones and ensure compliance with contractual obligations.
- Enforce safety protocols and regulations on-site, conducting regular safety inspections, and implementing corrective actions to prevent accidents and ensure a safe working environment.
- Communicate regularly with clients and project stakeholders, providing updates on project progress, addressing concerns, and ensuring client satisfaction throughout the process.
