CAREER SUMMARY

Highly accomplished Site Civil Engineer with more than 8 years of experience delivering diverse and complex construction projects across Egypt. Proven expertise in overseeing all on-site operations, managing resources and ensuring adherence to stringent quality, safety and regulatory standards. Seeking to leverage comprehensive technical skills and leadership abilities to contribute to the successful execution of challenging civil engineering projects within a dynamic organization.

WORK EXPERIENCE

Senior Site Civil Engineer | October 2022 – January 2025

Sama Alqahera for Contracting | Cairo, Egypt

Project:

Construction a lifting station and sewage network, Hayah Karima projects, Kom Ombo, Aswan.

Responsibilities:

- Supervised and mentored site engineers, surveyors and other technical staff.
- Assigned tasks and provided guidance.
- Liaised with project managers, architects, structural engineers, MEP engineers, subcontractors and other stakeholders to ensure seamless project execution.
- Contributed to the development and implementation of detailed construction plans, schedules and work methodologies.
- Monitored progress against the schedule and took corrective actions when necessary.
- Oversaw the allocation and utilization of labor, materials and equipment on-site to optimize efficiency and minimize waste.
- Prepared regular and detailed progress reports for the project manager and senior management, highlighting achievements, challenges and potential delays.
- Identified and resolved complex technical issues and site-related challenges promptly and effectively.
- Established and enforced rigorous quality control procedures to ensure all civil works were executed according to specifications and standards.
- Oversaw the selection, approval and inspection of construction materials to ensure compliance with project requirements.

Site Civil Engineer | April 2021 – October 2022

Al Saeed for Contracting and Trading | Ismailia, Egypt

Project:

Construction and finishing works for the Citizen Services Complex, part of the Hayah Karima projects, Jilbana Village, Ismailia.

Responsibilities:

- Oversaw all activities on-site, ensuring they were carried out according to the approved plans, specifications and safety regulations.
- Coordinated and supervised the work of labor on-site, ensuring efficient task completion.
- Tracked the work progress against the project schedule and identified any potential delays.
- Implemented and monitored quality control procedures to ensure workmanship and materials met the required standards.
- Conducted inspections and addressed any deviations.

- Ensured strict adherence to health and safety regulations on-site to prevent accidents and ensure a safe working environment.
- Monitored the delivery, storage and utilization of construction materials on-site to minimize waste and ensure availability.
- Identified and resolved day-to-day technical problems that arose on-site.
- Prepared Site Reports.

Site Civil Engineer | October 2019 – March 2021

Life Maker Foundation | Cairo, Egypt

Projects:

Development of Mother and Child Centers, Hayah Karima projects, 6 October.

SKILLS

Hard Skills

- Blueprint Reading and Interpretation.
- Surveying and Leveling.
- Quantity Surveying and Cost Estimation.
- Knowledge of Construction Methods and Materials.
- Structural Analysis Basics.
- Quality Control and Assurance.
- Site Investigation and Testing.
- Technical Report Writing.
- Risk Assessment and Management.
- Knowledge of Project Management Fundamentals.
- Resource Management.
- Scheduling and Time Management.
- Budget Control.

Soft Skills

- Ability to handle multiple tasks.
- Problem solving skills.
- Work under Pressure.
- Attention to details.
- Time Management.
- Analytical skills.
- Decision making.

Software Skills

- AutoCAD 2D
- Microsoft Office programs:
 - Excel
 - Word
 - Power Point

Language Skills

- Arabic (Native)
- English (Advanced)
