I am a highly skilled HSE Engineer with a Bachelor's degree in Industrial Engineering and a strong background in safety management. With certifications in ISO 45001, OSHA, NASP and risk handling, and experience working on large-scale projects with leading companies like Furat Company for Operation and Maintenance, The Expertise House, and AL-Sabq AL-Arabi, Fouad AL- Saleh & Khalid AL-Dhowalia Engineering Consultants. I am well-versed in developing and managing comprehensive safety programs, conducting safety inspections, and ensuring regulatory compliance, and experience spans implementing safety training, performing safety audits, and fostering a strong safety culture across various sectors in Saudi Arabia.

MY RESPONSIBILITIES

Safety Programs : Develop, implement, and manage comprehensive safety programs to create a Safe working environment, ensuring compliance with safety regulations and company policies.

Risk Management : Identify potential safety risks and develop mitigation strategies to maintain a safe work environment.

Safety Inspections : Conduct regular safety inspections of sites, equipment, and work processes to identify hazards and potential risks.

Safety Training : Provide safety training to employees and subcontractors, ensuring that all personnel are knowledgeable about safety protocols and procedures.

Emergency Response : Develop and implement emergency response plans and procedures, including first aid, evacuation, and incident reporting.

Safety Audits : Perform safety audits and assessments to evaluate the effectiveness of safety programs and suggest improvements.

Incident Investigation : Investigate and document safety incidents, near-misses, and accidents, and implement corrective actions to prevent recurrence.

Safety Documentation : Maintain detailed records of safety inspections, incidents, and corrective actions, and report safety performance to senior management.

Safety Culture : Promote a strong safety culture by leading safety meetings, conducting safety briefings, and engaging with project teams to instill safe practices.
