Objective

A Civil Engineer specialized in managing and executing construction, infrastructure, and road projects, with extensive experience in site supervision, engineering auditing, and quantity and cost analysis. Committed to improving execution quality by applying strict engineering standards. I seek to join a professional team in a leading company where I can contribute to enhancing project efficiency and ensure delivery within budget and the specified timeline.

Education

Bachelor of Science in Civil Engineering

Girne American University, Girne - Cyprus (2019)

Professional Experience

Site Engineer

Melad Al Ebdaa Contracting | Jan 2025 – Present

- Worked on finishing projects for villas and banks, ensuring precise execution according to approved designs.
- Supervised painting, flooring, ceiling, furniture, and installations within villas and banks.
- Coordinated with specialized teams to ensure the quality of finishes and their timely execution.
- Reviewed and implemented the technical requirements for each type of finishing to ensure compliance with specifications.

- Worked also on the finishes for bank ATMs, ensuring their compliance with the technical and engineering specifications for each type of ATM.
- Maintained the highest quality standards and adhered to safety regulations during execution.

Site Engineer

Samir Al-Kouz Contracting Co. | Aug 2024 -Jan 2025

- Executed a residential construction project consisting of 40 buildings, each with 5 floors, ensuring adherence to schedules and quality standards.
- Participated in the execution of paving works for roads, including excavation, leveling, and base layer preparation, ensuring compliance with specifications.
- Supervised asphalt works, ensuring precise application and durability in all paving tasks.
- Coordinated all activities between construction and paving works to prevent any project delays.
- Effectively managed challenges in a large-scale project, ensuring all tasks were completed on time.

Site Engineer

Al Bkairat Contracting Co. | Feb 2023 - July 2024

Infrastructure Projects at Jordan Electric Power Company

- Worked on the design and implementation of infrastructure projects for electrical networks.
- Contributed to the improvement and development of electrical systems to ensure continuous service.
- Managed work teams to ensure project execution according to timelines and technical standards.
- Coordinated with technical and administrative teams to provide effective and appropriate solutions.
- Conducted regular maintenance on infrastructure to ensure network efficiency.

Site Engineer

Al-Orobah for Crushers & Contracts | March 2022 - September 2022 (Mafraq Highway Rehabilitation)

- Supervised the execution of milling works, including the removal of damaged layers and preparing the surface for new paving.
- Coordinated paving operations and ensured the use of appropriate materials to achieve the best results.

- Monitored the progress of the work to ensure adherence to timelines and technical standards.
- Ensured the work was carried out in compliance with environmental and safety regulations.
- Oversaw quality control during execution and ensured the durability of the paved surfaces.

- Coordinated daily project operations, including reviewing schedules and verifying survey marks.
- Determined road axis and natural ground levels, ensuring compliance with design specifications.
- Produced daily and monthly reports to track project progress and mitigate delays.

Site Engineer

Haymoor Cousins & Partner Co. | July 2021 - February 2022 (BRT Project Phase 4)

- Supervised and executed the Bus Rapid Tunnel (BRT) tunnel construction according to engineering standards.
- Managed and executed road and bridge construction and development projects, focusing on improving and enhancing infrastructure.

Site Engineer

Ghaleb Abu Jiries & Partners Co. | August 2019 - November 2020 and March 2022 - September 2022

- Managed daily project operations, reviewing schedules and verifying survey marks.
- Executed road projects ensuring full compliance with design specifications.
- Generated daily and monthly reports to monitor project progress and prevent delays.
- Supervised the execution of milling works, including the removal of damaged layers and preparing the surface for new paving.

Skills

Technical Skills:

- Proficient in AutoCAD, MS Office Suite (Word, Excel, PowerPoint), Outlook, and internet tools.
- Quantity Estimation & Bill of Quantities (BOQ) preparation.
- Engineering drawing review and compliance auditing.

Project Management:

- Tender document preparation and coordination.
- Project documentation and handover.
- Invoice and payment auditing.

Soft Skills:

- Strong verbal and written communication skills in both Arabic and English.
 - Effective teamwork, leadership, and problem-solving abilities.
 - Strong time management and organizational skills.
-

Languages

- Arabic: Native
- English: Advanced
