## EXPERIENCE

### Senior Architect

*Al-Hada Contracting Company Ltd. , March 2023 - Current*

- Lead design & Site teams on multiple projects with variable scales, enhancing project delivery timelines.
- Coordinated with multidisciplinary teams to resolve design and technical challenges.
- Implemented sustainable design practices, following the dedicated standards and specifications.
- Facilitated client meetings and presentations, improving client satisfaction.
- Collaborating with the estimation and procurement team to prepare the multiple bidding process.
- Mentoring junior architects, leading the team's skill levels and project contributions.

### Project Architect

*Al-Hada Contracting Company Ltd. , January 2018 – March 2023*

Supervised a design and construction of several large-scale workplace projects with an approximate total cost of 410 million SAR.

- **Rehabilitation of Obstetrics & Gynecology Hospital – PSMMC**

Project description:

Complete hospital project with a total cost of approximately 100 million SAR, a total built-up area of 26000 m<sup>2</sup>, 11 floors, and a capacity of 250 beds.

Responsibilities

Project architect, leading a team responsible for preparing all project documentation, coordinating with consultants, and following up on shop drawings, material selection, as-built drawings, until the project was handed over procedures.

- **Chronic Center Hospital**

Project description:

Centralized Hospital Project with a total cost of approximately 180 million SAR, a total built-up area of 20300 m<sup>2</sup>, six floors, and a capacity of 400 beds.

Responsibilities

It was my first project at the current company, where I resumed the former project architect's responsibilities, which included completing shop drawings, selecting materials, supervising the site, and coordinating with the consultant until the as-built drawings stage.

## EXPERIENCE

### - **TMO Administration Building – Diplomatic Quarter**

#### Project description:

The main administrative building for TMO has a total built-up area of 5,600 m<sup>2</sup> and consists of two floors, in addition to the external landscape and parking area.

#### Responsibilities

project architect, I lead a team that includes junior architects in preparing all project documentation, My responsibilities involve coordinating between the principal design office and two different consultants, K&A and Dar. Additionally, I select materials, supervise the site as needed, and oversee the furniture setup. I was also responsible for preparing a master key matrix for all the complete building doors in cooperation with the manufacturer.

### - **National Guard Hospital OR's**

#### Project description:

Renovation of the entire operating theaters at the National Guard hospital to modular system, divided into three phases, covering a total area of 1,900 m<sup>2</sup>.

#### Responsibilities:

Project Coordinator between the modular system manufacturer "Ingromed Germany/Karl Storz France" and other high-level electro-mechanical services and medical gas systems.

### - **Nursery Iskan**

#### Project description:

Design and construction of a high-level nursery school covering an area of 6900 m<sup>2</sup>, along with external landscaping & a children's park area.

#### Responsibilities:

lead designer for the project, coordinating with consultants and participating in the construction, material selection, and finishing stages, which led to a successful handover in just six months.

### - **Other Projects**

- Construction of Al-Kharj Sport City Complex ( Built-Up Area 8200 m2)
- Construction of Out-Patient dental Center PSMCC ( Built-Up Area 5300 m2)
- Renovation of Cath-Labs & Recovery Wards, Cardiac Center PSCC. (Area 1200 m2)
- Construction of Main Price Sultan City Mosque ( Built-Up Area 2650 m2)
