

# Abdulsattar Khan

Civil Site Inspector  
Civil Site Engineer

abdulsattarcsp@gmail.com

+966 598771864

Iqama: Transferable

Residence: Riyadh Saudi Arabia

## CORE STRENGTHS & SKIL

- Quality Control
- Construction Safety
- Site Safety
- Field Inspection
- CAD Documentation
- CAD Drafting
- AutoCAD Drawing
- Scale Model Design
- Project Estimation
- Review Designs
- Data collection

## KEY CAREER HIGHLIGHTS:

- **Site Engineer Experience:** In the early stages of my career, I gained valuable experience as a Site Engineer, where I was responsible for overseeing day-to-day site activities and ensuring smooth project execution. I managed various construction processes, including coordinating with subcontractors, monitoring labor productivity, and ensuring that all activities aligned with project schedules. A key part of my role involved supervising construction teams to ensure adherence to design specifications, quality standards, and safety protocols.
- **Project Success:** Contributed to multiple projects, overseeing quality control procedures, monitoring construction activities, and ensuring that project milestones were met within deadlines and budget constraints.
- **Technical Proficiency:** Proficient in **construction quality assurance** practices, including inspection, documentation, and reporting, as well as site supervision and coordination with contractors and stakeholders.

## LANGUAGES COMMAND:

- English
- Urdu
- Pashto

## Computer Skills:

- MS Office
- Auto CAD
- Civil 3D

## PROFESSIONAL EXPERIENCE

### NESMA & PARTNERS

**Project:** KING SALMAN PARK RIYADH.

Working as “Civil Site Inspector” July 2023 – March 2025

### Responsibilities/Accomplishments:

As a **Civil Site Inspector**, my key roles and responsibilities include:

1. **Site Supervision:** Oversee daily construction activities, ensuring work aligns with design plans, safety standards, and schedules.
2. **Quality Control:** Ensure materials and work meet required standards through regular inspections and testing.
3. **Safety Compliance:** Monitor safety protocols, conduct audits, and ensure a safe work environment in line with local regulations.
4. **Coordination:** Communicate with engineers, architects, contractors, and clients to resolve issues and ensure project goals are met.
5. **Resource Management:** Allocate and manage labor, materials, and equipment efficiently to avoid delays.
6. **Documentation:** Maintain site records, progress reports, and compliance documents for legal and regulatory requirements.
7. **Problem-Solving:** Address and resolve site issues promptly to minimize delays and ensure smooth project execution.
8. **Cost Control:** Monitor and manage project costs, ensuring the project stays within budget.

## SAUDI CONSTRUCTIONERS (SAUDICO)

**Project:** Construction of Building Abdullah City Riyadh

**Worked as “Civil Site Supervisor”,** March, 2021– June 2023

### **Responsibilities/Accomplishments:**

- **Supervise Construction Activities:** Monitored and supervised daily construction operations on site, including excavation, foundation work, concrete pouring, rebar installation, masonry, and finishing activities, ensuring compliance with approved drawings and project specifications.
- **Coordinate with Project Teams:** Collaborated with project managers, contractors, and subcontractors to plan and coordinate construction activities, ensuring that work progressed according to the project schedule and quality standards.
- **Quality Control Implementation:** Inspected construction work regularly to ensure quality standards were met; addressed any deviations from design plans, specifications, and industry standards promptly.
- **Health and Safety Compliance:** Ensured that all site activities adhered to safety regulations and protocols, promoting a safe work environment and reducing the risk of accidents or hazards.
- **Progress Monitoring and Reporting:** Tracked and recorded daily construction progress, prepared regular progress reports for project stakeholders, and communicated any delays or issues impacting the schedule.
- **Client and Consultant Coordination:** Liaised with clients, consultants, and other stakeholders during site visits, inspections, and meetings, providing updates on project progress and addressing concerns.
- **Problem-Solving and Issue Resolution:** Identified construction challenges, including site constraints or material shortages, and worked with the project team to develop effective solutions to maintain project continuity.
- **Compliance with Local Regulations:** Ensured that all construction activities complied with local building codes, regulations, and environmental guidelines.

## (NMG) SAUDI HEALTH CARE WORKSPACE SOLUTIONS

**Project:** Construction of Buildings

**Worked as “Civil Site Supervisor”,** July, 2017– Jan 2021

### **Responsibilities/Accomplishments:**

- **Supervise Construction Activities:** Monitored and supervised daily construction operations on site, including excavation, foundation work, concrete pouring, rebar installation, masonry, and finishing activities, ensuring compliance with approved drawings and project specifications.
- **Coordinate with Project Teams:** Collaborated with project managers, contractors, and subcontractors to plan and coordinate construction activities, ensuring that work progressed according to the project schedule and quality standards.
- **Quality Control Implementation:** Inspected construction work regularly to ensure quality standards were met; addressed any deviations from design plans, specifications, and industry standards promptly.
- **Health and Safety Compliance:** Ensured that all site activities adhered to safety regulations and protocols, promoting a safe work environment and reducing the risk of accidents or hazards.
- **Progress Monitoring and Reporting:** Tracked and recorded daily construction progress, prepared regular progress reports for project stakeholders, and communicated any delays or issues impacting the schedule.
- **Client and Consultant Coordination:** Liaised with clients, consultants, and other stakeholders during site visits, inspections, and meetings, providing updates on project progress and addressing concerns.
- **Problem-Solving and Issue Resolution:** Identified construction challenges, including site constraints or material shortages, and worked with the project team to develop effective solutions to maintain project continuity.
- **Compliance with Local Regulations:** Ensured that all construction activities complied with local buildings.

## **(PID) PARTNERS IN DEVELOPMENT CONSULTING ENGINEERS**
