As a highly motivated and detail-oriented Civil Engineering Technologist, I am eager to apply my strong foundation in construction standards, material testing, and quality control to a QA/QC Inspector role. With a keen eye for detail and a commitment to ensuring structural integrity and compliance with industry codes, I aim to contribute to high-quality project delivery. I am passionate about collaborating with experienced teams to implement effective inspection procedures, uphold safety standards, and support the successful execution of civil infrastructure projects.

SKILLS

Communication Skills	Ability to Work Under Pressure
Leadership	Logical Thinker
Creativity & Innovation	Organizational Skills
Site Inspection & Documentation	Cost Control
Subcontractor management	Safety Awareness
People Management	

EDUCATION

BS	Punjab Tianjin University of Technology B.Sc. Civil Engineering Technology	Sep 2020 - July 2024
DAE	Ahmad Hassan Polytechnic Institute Diploma of Associate Engineering in Civil Engineering	Sep 2016 - July 2019

EXPERIENCE

QA/QC Inspector

Saudi Icon
Riyadh, KSA

June 2024 - May 2025

- Conducted detailed inspections to verify compliance of construction activities with approved drawings, specifications, method statements, and quality standards.
- Implemented project-specific quality control plans and inspection & test plans (ITPs), ensuring systematic monitoring at all construction stages.
- Coordinated and performed material inspections, concrete sampling, slump testing, and cube testing in accordance with relevant codes.
- Prepared and submitted inspection requests (IRs), material submittals (MS), Material Inspection Requests (MIRs) and daily quality reports for consultant/client approval.

- Identified and documented non-conformances (NCRs), followed up on corrective/preventive actions, and verified close-out of quality issues.
- Collaborated with site engineers, foremen, and subcontractors to resolve technical issues and ensure timely rectification of quality deviations.
- Reviewed contractor submittals and ensured materials and equipment met project and client requirements before use on site.
- Verified as-built drawings and redline markups to support project documentation and handover process.

QA/QC Inspector

Tameer Construction (Pvt.) Ltd.

Sep 2023 - May 2024

Gujranwala, Pakistan

- Monitored daily site activities to ensure compliance with approved drawings, basic quality standards, and construction procedures.
- Assisted in the preparation and submission of inspection requests (IRs) for various civil activities such as formwork, steel fixing, and concrete works.
- Coordinated with the site engineer and consultant during routine inspections and followed up on comments and approvals.
- Verified proper use of approved construction materials at the site and reported any deviation to the QA/QC Engineer.
- Conducted basic checks on steel reinforcement, shuttering alignment, and concrete pouring areas before inspection.
- Maintained daily site quality records, including activity logs and inspection documentation.
- Helped in identifying minor non-conformities and supported in implementing corrective actions as per site instructions.
- Supported procurement and site teams by checking material deliveries against approved submittals.
- Ensured general adherence to site safety and cleanliness during inspection activities.

Civil Site Supervisor

MAAQ Associates

Jan 2020 – June 2020

Lahore, Pakistan

- Supervised daily site operations to ensure adherence to project plans and specifications.
- Coordinated the work of construction crews, subcontractors, and suppliers to ensure smooth operations.
- Verified that construction work was progressing according to the schedule, making adjustments as needed.
- Assisted in resolving technical issues and provided guidance to the construction team.
- Conducted site inspections to verify that all work was completed according to approved designs and regulatory standards.
- Liaised with engineers, architects, and project managers to ensure project milestones were met.

Civil Site Supervisor

Arch N Plan

Lahore, Pakistan

July 2019– Dec 2019

- Monitored the quality of workmanship and materials, ensuring they met the required standards.
- Ensured compliance with safety regulations and conducted regular safety inspections to prevent accidents.
- Supervised daily site operations to ensure adherence to project plans and specifications.
- Coordinated the work of construction crews, subcontractors, and suppliers to ensure smooth operations.
- Verified that construction work was progressing according to the schedule, making adjustments as needed.
