

ABDULMOHSEN YOUSEF ALAMER

📍 Riyadh | 🇸🇦 Saudi | ✉ abdulmohsen.alamer2@gmail.com | 📞 +966509991163

PROFESSIONAL SUMMARY

A highly motivated Mechanical Engineer and Project Manager, specializing in HVAC systems and water infrastructure projects. I possess extensive experience in project planning, cost control, and team leadership, along with advanced skills in using AutoCAD for system design and ensuring compliance with industry standards. I have a strong background in logistics and supply chain management and am a PMP-certified professional committed to optimizing operations and delivering high-quality solutions.

Work Experience

Duty Supervisor - SAL-Saudi Arabia Logistics, Riyadh (May 2019 – Present)

- Implemented a logistics optimization strategy that improved supply chain efficiency and reduced operational costs.
- Designed and executed an advanced dispatch route system, reducing transit times and improving delivery reliability.
- Developed and enforced FIFO (First-In, First-Out) inventory control methods, increasing warehouse efficiency.
- Led multiple logistics projects that enhanced operational workflows and boosted overall team performance.
- Managed and executed a comprehensive X-ray maintenance project, ensuring operational readiness and compliance with safety standards.

Mechanical Engineer & Project Manager - Abdulmohsen Nasser Aldersone, Hail (May 2016 May 2017)

- Led the design and implementation of HVAC and sewage water systems for infrastructure projects.
- Utilized AutoCAD to design and optimize pipeline layouts to ensure efficiency and compliance.
- Managed project schedules, budgets, and team coordination.
- Ensured adherence to safety regulations and industry standards.

Selected Projects

Logistics Optimization Project, Riyadh (From 2020 – Present)

- Developed strategic delivery route enhancements.
- Achieved a 15% reduction in transit time and improved customer satisfaction.

HVAC & Water Pipeline Infrastructure Project, Hail (2016-2017)

- Designed and implemented a comprehensive water distribution and HVAC system for a mid-scale facility.
- Ensured energy efficiency and cost-effectiveness.

Education

Mechanical Engineering, June 2015.

- University of Hail

Certifications

- Project Management Professional (PMP).
- Quality of Production and Service Operation.
- Creative Designing using AutoCAD.
- Aviation (IATA & GACA) Courses.
- Project-Based Learning Programme in Data Analysis.
- Cybersecurity Foundation.

Skills

- Engineering & Design: HVAC Systems, Water & Sewage Networks, AutoCAD and Compliance Standards.
- Project Management: Scheduling, Budgeting, Risk Management and Stakeholder Communication.
- Logistics & Supply Chain: Transportation Management, Inventory Optimization and FIFO Strategies.
- Technical Skills: Troubleshooting, Problem-Solving, Decision-Making and Process Improvement

Languages

- Arabic.
- English.
