## Career Summary:

Successfully led and managed multiple engineering projects from inception to completion as a Project Engineer. Responsibilities included coordinating with cross-functional teams, ensuring adherence to project timelines, budgets, and quality standards. Possesses a strong background in project planning, risk management, and resource allocation, consistently delivering projects on time and within budget. Expertise in solving complex technical challenges, combined with effective communication and leadership skills, consistently resulted in successful project outcomes and high client satisfaction.

## Skills:

- Technical Proficiency
- Compliance & Quality Assurance
- Risk Management
- Adaptability & Learning
- Communication & Collaboration
- Communication
- Problem-Solving
- Project Planning & Coordination
- Data Analysis
- Time Management
- Documentation & Reporting
- Compliance

## Work Experience:

**Civil engineer | Tecnicas Reunidas Company (TR) | Al Khobar, SA** **Oct 2024 - Present**  
**Aramco Projects**

- Design and analyze structural components using STAAD. Pro software.
- Create and validate designs for pipe racks, foundations, and buildings.
- Utilize Excel for data analysis, calculations, and reporting.
- Ensure compliance with Aramco engineering standards, prepare detailed reports, and manage design documentation.

**Civil site engineer | Modern Building Leaders | Al-riyadh, SA** **Jan 2024 - Oct 2024**

- Supervised daily site activities, ensuring construction aligned with project plans, specifications, and timelines.
- Conducted regular inspections to maintain quality standards and adherence to building codes.
- Monitored material usage on-site, ensuring efficiency and compliance with specifications.
- Enforced safety protocols to ensure a safe working environment and regulatory compliance.
- Liaised with architects, contractors, and stakeholders to facilitate smooth project communication and coordination.
- Prepared and submitted progress reports, addressing any issues to keep the project on track.
- Identified and resolved technical or operational issues during construction to minimize disruptions.
- Maintained accurate records of site activities, including work progress and material usage.
- Conducted site surveys and measurements to ensure accurate implementation of construction plans.
- Assisted in planning and resource allocation to optimize site operations and meet deadlines.

**Project Engineer (Cooperative Training) | Aramco | Alkhobar, SA** **Dec 2022 - Jun 2023**

- Checked plans, drawings, and quantities to ensure the accuracy of calculations and alignment with project requirements.
- Ensured that all work was performed according to the project's technical specifications and drawings, maintaining the highest standards of quality.

- Planned the work and efficiently organized site facilities to meet agreed-upon deadlines, ensuring smooth and timely project execution.
- Supervised the site during construction, overseeing the implementation of work to ensure it met the project's high standards and specifications.
- Conducted regular inspections to ensure that all work adhered to the approved plans and technical specifications, identifying and resolving any discrepancies.
- Monitored project timelines and progress, making necessary adjustments to ensure that all milestones were met on schedule.
- Managed and allocated resources efficiently to optimize site operations and maintain productivity.
- Identified potential risks on-site and developed strategies to mitigate them, ensuring the safety and success of the project.
- Maintained accurate documentation of site activities, including daily reports, material usage, and progress updates, for effective project tracking and reporting.

### **Civil Engineer (Cooperative Training) | Royal commission for Jubail and Yanbu | Jizan, SA Jun 2022 - Aug 2022**

- Verified the accuracy of plans, drawings, and quantities, ensuring compliance with project requirements.
- Ensured construction adhered to technical specifications and maintained high quality standards.
- Planned and organized site activities to meet deadlines, optimizing operations and resource allocation.
- Supervised construction activities to ensure adherence to project specifications and high standards.
- Coordinated with consultants, subcontractors, and stakeholders to ensure effective communication.
- Conducted inspections and quality checks to verify compliance with approved plans and specifications.
- Managed site resources, including materials and equipment, to support efficient project execution.
- Identified and mitigated site risks to ensure safety and successful project outcomes.
- Monitored project progress, addressed issues, and kept the project on schedule.
- Prepared and maintained comprehensive project documentation, including reports and technical records, for effective management.

### **Education:**

---

- **Bachelor's Degree in Science of Civil Engineering | Jazan university | Nov 2023 | GPA 4.13**
- **Graduation Project:** Designing the branch network and closed-loop water distribution system manually using EPANET software for an urban area. The aim of the study was to develop analytical tools and procedures for designing water distribution systems at the lowest cost. Using several programs in this project: 1-Microsoft Excel 2-Epanet 3-ETAPs 4-SAP2000 5-MSPRoject

### **Certifications & Courses:**

---

- Piping construction and sizing Aramco
- Project management at Harvard managementor.
- Time management at Harvard managementor.
- ACI Membership American Concrete Institute
- ASCE Membership American Society of Civil Engineers.

### **Language:**

---

- Arabic : Native
- English: Excellent
