

# FAWAD ALI Senior Civil Engineer

Saudi Arabia | 00966 591515335 | fawadali036@gmail.com

---

## ➤ PROFILE SUMMARY

Experienced Civil Engineer with over 9 years of experience in delivering road and infrastructure projects, including wet and dry utilities, water transmission pipelines, and complex building structures such as academic institutions, substations, warehouses, and electrical facilities. Proven ability to manage all phases of civil engineering projects—from planning and execution to final handover—ensuring timely delivery, technical accuracy, and alignment with project specifications and engineering standards. Skilled in site supervision, coordination with multidisciplinary teams, and managing subcontractors and suppliers. Adept at handling construction documentation, including red-mark drawings, as-built drawings, and turnover packages. Committed to delivering high-quality, cost-effective engineering solutions that meet both client expectations and regulatory requirements.

## ➤ PERSONAL DETAILS

---

**Nationality:** Pakistani

**Marital status:** Married

**LinkedIn:** [www.linkedin.com/in/fawad-ali-wahid-mmup-upda-31629a19b](http://www.linkedin.com/in/fawad-ali-wahid-mmup-upda-31629a19b)

**Email:** fawadali036@gmail.com

**Phone No.:** 00966 591515335

**Iqama Number:** 2608316747

**Visa status:** Transferable

## ➤ Education

---

### **B.Sc. Civil Engineering (2016):**

Sarhad University of Science and Information Technology Peshawar, Pakistan

## ➤ Experience

### **1. UCC InfraRoad (UCC Holding)**

---

**Position:** Senior Civil Engineer

**Period:** August 2022 to Jan 2025

**Project:** Road and Infrastructure Al Mearad & Southwest of Muaiter-PACKAGE-6

**Client:** Ashghal (Qatar's Public Works Authority)

#### **Responsibilities:**

- Supervise and manage daily site activities related to roadwork, utilities, and infrastructure development.
- Review and interpret construction drawings, technical specifications, and project plans to ensure compliance and accuracy.
- Coordinate with consultants, contractors, and subcontractors to ensure timely execution of project activities.
- Monitor progress of civil works, ensuring adherence to project schedule, budget, and quality standards.
- Oversee the installation of wet and dry utility networks, including storm water, sewage, potable water, electrical,

and telecom systems.

- Conduct site inspections to verify that work is being carried out as per approved designs, standards, and safety protocols.
- Liaise with design teams to resolve on-site technical issues and implement design modifications where necessary.
- Prepare and maintain project documentation such as work progress reports, as-built drawings, and daily site records.
- Manage material requisitions, delivery schedules, and ensure availability of required resources on site.
- Ensure compliance with local authority regulations, environmental requirements, and permitting processes.
- Participate in site meetings and provide updates to project managers and stakeholders regarding progress and challenges.
- Conduct quality checks and support third-party inspections related to road layers, compaction, concrete works, and utilities.
- Facilitate coordination between different trades and ensure smooth execution of interdependent activities.
- Assist in preparing handover documentation and final inspection reports upon project completion.

## **2. PowerChina Guizhou Engineering Co., LTD**

---

**Position:** Senior Civil Engineer

**Period:** October 2021 to December 2022

**Project:** AL KHARSAAH Solar Power Plant 800.15MW PV IPP

**Client:** Qatar General Electricity & Water Corporation (Kahramaa)

### **Responsibilities:**

- Review and interpret civil design drawings, site plans, and specifications for solar plant construction.
- Conduct site surveys and assessments to evaluate land suitability, topography, soil conditions, and drainage for solar installations.
- Supervise and manage civil construction activities such as land grading, site leveling, and access road construction.
- Oversee foundation works for solar panel structures, inverters, transformers, and control buildings.
- Coordinate with structural engineers and contractors to ensure correct implementation of mounting systems.
- Monitor installation of cable trenches, duct banks, boundary walls, storm water systems, and drainage facilities.
- Ensure all civil works adhere to safety standards, environmental guidelines, and approved quality specifications.
- Plan and schedule civil construction tasks to align with overall project timelines and milestones.
- Manage materials procurement, delivery schedules, and verify quality of civil construction materials on site.
- Address and resolve technical issues, design discrepancies, or unforeseen site conditions during execution.
- Maintain daily site records, progress reports, and construction documentation.
- Liaise with electrical and mechanical teams to coordinate civil interfaces with PV modules, substations, and control equipment.
- Conduct inspections and support quality control activities related to foundations, earthworks, and structural installations.
- Ensure proper implementation of storm water management and erosion control measures during and after construction.
- Participate in testing, commissioning support, and preparation of civil handover documentation.

### **3. MedGulf Construction Co. WLL**

---

**Position:** Civil Engineer

**Period:** April 2017 to August 2021

**Project:** Hanger for Qatar Amiri Maintenance Corp (Warehouses and G+7 Building)

**Client:** Qatar Amiri Guard and Army

**Project:** South AL-Meshaf Roads and Infrastructure Development Project

**Client:** Ashghal (Qatar's Public Works Authority)

#### **Responsibilities:**

- Review and interpret construction drawings, technical specifications, and project documentation for buildings, hangars, roads, and utilities.
- Supervise all civil and structural works including excavation, foundation laying, reinforcement, formwork, concrete casting, and steel erection.
- Manage vertical construction works such as structural framing, slab casting, columns, beams, staircases, and roof systems in multi-story buildings.
- Oversee large-span structural steel erection for hangars and warehouse buildings, ensuring alignment, stability, and compliance with safety codes.
- Coordinate and supervise internal and external infrastructure works including roads, pavements, sidewalks, and asphalt layers.
- Execute wet and dry utility installations such as potable water lines, storm water systems, sewer networks, electrical/telecom ducts, and manholes.
- Plan and implement site grading, backfilling, compaction, drainage systems, and erosion control measures.
- Liaise with project consultants, architects, and subcontractors to ensure smooth coordination across civil, structural, and MEP disciplines.
- Ensure adherence to project timelines, technical standards, and Qatar Construction Specifications (QCS) or other applicable codes.
- Conduct quality checks for construction works such as soil compaction, concrete testing, waterproofing, finishing, and alignment.
- Manage material requests, track deliveries, and verify that on-site resources meet the project's engineering and quality requirements.
- Review and approve civil-related shop drawings, method statements, red-mark drawings, and as-built documentation.
- Participate in progress review meetings, technical discussions, and coordination sessions with stakeholders.
- Maintain daily site logs, inspection records, progress reports, and construction documentation.
- Support safety officers in enforcing site HSE regulations, ensuring compliance with safety standards and best practices.
- Assist with commissioning, final inspections, punch list resolution, and handover documentation preparation.

### **4. Al Rashid trading and contracting**

---

**Position:** Site Engineer

**Period:** October 2016 to March 2017

**Project:** Water transmission system- new satellite plant

**Client:** SWCC

### **Responsibilities:**

- Manage excavation, trench preparation, pipeline alignment, and backfilling for water transmission lines.
- Supervise the construction of supporting civil elements such as inspection chambers, thrust blocks, and site access routes.
- Collaborate with mechanical and electrical teams to align civil work with utility and equipment installations.
- Perform routine site checks to ensure construction activities meet approved drawings, codes, and safety protocols.
- Evaluate and endorse technical documents including construction drawings, work methods, and material proposals.
- Track on-site activities, document construction progress, and prepare regular updates for project stakeholders.
- Oversee civil readiness for testing and commissioning of pipeline systems, including hydrotesting zones.
- Assist in final walkthroughs, close-out inspections, and the compilation of as-built drawings and turnover packages.

## **5. Khyber Pakhtunkhwa Oil and Gas Company Limited (KPOGCL)**

---

**Position:** Civil Supervisor

**Period:** June 2015 to August 2016

**Project:** Nowshera Block

**Client:** OGDCL

### **Responsibilities:**

- Supervise on-site construction tasks to ensure work is executed according to plans, specifications, and timelines.
- Coordinate labor, equipment, and material deliveries to support uninterrupted site operations.
- Enforce safety protocols and verify that construction activities meet regulatory and quality standards.
- Keep accurate daily logs, track site progress, and provide updates to the site engineer or project management team.

### **➤ Technical Skills**

---

- **Software tools:** AutoCad, Primavera P6, SAP2000
- **MS Office.**

### **➤ Communication Skills**

---

1. Effective and fluent communication in English, Pashto & Urdu Languages.
2. Good interpersonal skills and problem handling abilities.

### **➤ Co-Curricular Activities**

---

3. Playing Football, Table Tennis & Swimming

### **➤ References**
