## SUMMARY

A dedicated Site Engineer with extensive experience in civil engineering projects, including residential construction and drainage works, is excited to contribute to impactful initiatives. Proficiency in industry-standard software and a strong educational foundation in civil engineering underscore a commitment to excellence. Passion for sustainable infrastructure and community-focused development is combined with a proven ability to manage complex projects, ensuring alignment with operational goals and quality standards.

## KEY ACHIEVEMENTS

### Project Supervision

Supervised completion of 200+ residential units in New Ismailia.

### Cost Reduction Success

Reduced project costs by 15% through efficient resource management.

### Team Leadership Excellence

Led team to finish drainage project 2 months ahead of schedule.

### Safety Improvement Initiative

Improved construction safety standards, decreasing incidents by 30%.
