## OBJECTIVES

As a project manager, I possess strong skills in project management, planning, execution and resource management. I have outstanding abilities in communicating with stakeholders and coordinating activities to achieve optimal result. My extensive experience includes cost management, quality assurance and flexible handling of engineering challenges. I am committed to achieving the highest standards quality and safety throughout all project phases, with the ability to adapt to challenges and provide innovative solutions to ensure success.

## EDUCATION

**BS OF Civil Engineering** 2013 - 2018  
ALMAJMAAH UNIVERSITY

## CERTIFICATES

**Project Management Professional (PMP)** 04/2025 - Present  
PROJECT MANAGEMENT INSTITUTE

## EXPERIENCE

**Project Manager - (PMO)** 2024 - Present  
UNITED AMANA COMPANY

Project Manager for storm and ground water grids project covering the western region of Riyadh. My work focuses on strengthening the project's strategic goals, planning, and preparing the project timeline. Additionally, I manage and measure work quality, ensure effective communication with stakeholders to achieve their satisfaction and gain their support, and handle financial summaries and project correspondence. I also oversee progress to maintain the project's completion rate throughout its lifecycle.

**Project Engineer** 2020 - 2024  
UNITED AMANA COMPANY

I worked as a Project Engineer on Maintenance and Operation Project for storm and ground water grids covering the northern region of Riyadh. My responsibilities focused on managing quality throughout the project by ensuring that all work complied with approved standards and specifications. I also oversaw the implementation of safety protocols across project sites to maintain a secure working environment. Additionally, I was responsible for following up on work orders to ensure their accurate and timely execution while coordinating with relevant stakeholders to maintain efficient project operations and achieve the project's objectives.

**Supervisor** 2018 - 2020  
NAMEER WATER FACTORY

I am responsible for supervising the entire production process and managing workers within the production hall. My role focuses on ensuring that the final product meets the required quality standards while achieving the set production targets. I also monitor and inspect production machinery to prevent any defects that may disrupt operations. Additionally, I organize the workflow by defining responsibilities, preparing shift schedules, and ensuring smooth and efficient production processes.
