Mohammed.y.alhadi@gmail.com

SUMMARY

Electrical engineer with solid experience in project and team management, specializing in site supervision and field execution. Holding an MBA, I combine technical expertise with strong leadership and organizational skills to deliver successful, high-quality projects on time.

EXPERIENCE

01/2022 - PRESENT

ELECTRICAL ENGINEER, MONASIB COMPANY.

- Implemented various lighting projects for tunnels and bridges throughout the city of Riyadh.
- Leading a team responsible for inspecting and maintaining road lighting systems, including masts, poles, lighting control devices, transformers, electrical circuit breakers, cables, and related components.
- Installing and maintaining submersible pumps in tunnels and their control panels.
- Developing and implementing pump control panels for bridges and tunnels.
- Implementing maintenance work for the ATS system (Automatic Transfer Switch) to ensure that electricity is not cut off from bridges and tunnels.
- Rapid response to maintenance requests related to electrical works required by the owner (Riyadh Municipality) with good coordination with the relevant authorities.
- Ensuring that electrical systems, such as lighting, pumps, etc., operate efficiently in the event of a medium voltage outage, through electrical generators.

07/2021 - 01/2022

ELECTRICAL SITE ENGINEER, ALSAIF ENGINEERING OFFICE.

- Implementation of electrical works in the university lobby project at King Saud University.
- Viewing electrical plans and amending what is necessary based on the Saudi Electricity Code.
- Preparing periodic reports and attending meetings with representatives of King Saud University.
