SUMMARY

Qualified surveyor with over 6 years of experience in executing precise surveying operations for infrastructure projects, roads, and residential complexes. I have extensive experience using Total Station, GPS, and Level equipment for positioning and surveying points. I am proficient in Civil 3D, AutoCAD, and Excel.

PROFESSIONAL EXPERIENCE

Surveyor | Al-Ghanemy Company – Sawary Alexandria Project (Buildings and Construction)

January 2024 - July 2025

- Positioned over 30 main reference points for a project comprising 35 buildings with high precision using GPS equipment
- Marked all building boundaries using Total Station equipment with exceptional accuracy
- Executed elevations and road surfaces with utmost precision using Level equipment
- Extracted and directed coordinates of all project elements according to executive drawings
- Coordinated with consultants to deliver coordinates and ensured their precise compliance with design plans
- Maintained operation of surveying equipment at the highest precision levels to ensure work quality

Surveyor | Round Runner -Regional Road Development

January 2023 - December 2023

- Positioned road reference points using GPS equipment
- Determined road boundaries and centerlines using Total Station equipment
- Completed elevation and road surface determination work with high precision using Level equipment
- Extracted coordinates and delivered them to consultants
- Executed cross and longitudinal sections according to executive drawings

Surveying Specialist | Road Runner Company – Ain Sokhna Road Development

May 2022 - December 2022

- Positioned road reference points using GPS equipment
- Determined road boundaries and centerlines using Total Station equipment
- Completed elevation and road surface determination work with high precision using Level equipment
- Extracted coordinates and delivered them to consultants
- Executed cross and longitudinal sections according to executive drawings
- Committed to operating equipment with high precision

Surveyor | Sun Company - Nasr City Road Development

December 2021 - April 2022

- Established road boundaries and centerlines using Total Station equipment
- Supervised execution of elevations and road surfaces with precision using Level equipment
- Extracted coordinates and delivered them to consultants
