OBJECTIVE

Seeks a better opportunity in the capacity of senior position in “**PIPING SUPERVISOR**” by exploring the available technology and best practices in the construction industry, to build best professional experiences with highest degree of responsibility which to attain a better life.

CAREER STATEMENTS

I consider myself as totally professional and goal driven. I have always done my job with honesty, integrity and capable to hold full responsibility wherein my duties are considered. In the past I had been tried my level best to learn new methods and procedures from various projects and adapt to various situations where it really required.

CAREER PROFILE & ACHIVEMENT

Diploma in Mechanical Engineering, with 17+ years of experience in shop and field fabrication, assembly, erection, project material controlling, test pack and punch list, testing and Pre commissioning Work Experience in, Thermal power plant.

Test pack and Punch list, Testing, Commissioning and Pre commissioning of Oil & Gas, Power & Petrochemical industries. Worked as, Site In Charge for different types of projects, such as Refinery, Gas plant, Flow line of Oil & Gas, skid of Work Experience in Pipeline Flushing/Cleaning is one required method for cleaning pipes and ensuring they are free of natural gas or other chemicals. This is usually done using internal moving devices called Pigs or chemical compounds. piping helps remove debris, clean the pipe internally, and conduct procedures like sealing of water or the oil product when commissioning happens. In addition, pigs are used even when the pipelines are in service to help in maintenance work and inspection of the pipeline for dents, leaks, or corrosion. Hydrostatic Pretesting involves using a liquid, often water with a dye, to reveal pipeline vulnerabilities. Then, when the fluid is passed through the pipe at high pressures, the lines are screened to find weak spots, thin sections, and tiny portions that can impact the pipeline’s integrity. Pipeline Purging is conducted to remove any air present in the pipes. Air contains suspended impurities which can affect the quality of the gases being moved through the pipes. Pipeline purging removes air trapped in the pipes using inert Nitrogen gas.

Effective communication, interpersonal and leadership / influencing skills. Computer Literate, good command over spoken and written English.
