WORK EXPERIENCE

FAL AL JANOUB OPERATION AND MAINTENANCE COMPANY

Abha
Mar 2024-Present

Electrical Engineer

Entity: Saudi Electricity Company – Asir Electricity Management
Department: Construction Department – Asir Construction Section

Overseeing the implementation of electrical service delivery works for subscribers within distribution network projects. Preparing daily and weekly reports detailing work progress, completion rates, and technical and organizational notes. Documenting implementation stages and reviewing data received from field teams.

Coordinating with relevant departments and entities to ensure accuracy and speed of technical procedures.

Contributing to solving technical problems and field obstacles that may face implementation teams during service delivery to subscribers, and working on providing appropriate solutions in coordination with concerned parties.

Good knowledge of using the SAP system for business and resource management in the company.

Practical experience in the Unified Distribution System (UDS) used in the Saudi Electricity Company to support technical follow-up operations and document service delivery stages.
