### SUMMARY

---

A fresh graduate from the College of Architectural Engineering at Jazan University, driven by strong passion and enthusiasm to embrace all challenges with an open mind. I have a deep interest in sustainability and Saudi building culture, with a commitment to integrating both in architectural design. I strive to create solutions that balance heritage and innovation, reflecting a vision for a sustainable and culturally rooted future.

### EDUCATION

---

**Bachelor's degree in architectural engineering, Jazan University** 2021 – 2025

Graduation Project : Haze of Beans (Khawlani Coffee Research Center). Jazan

Jazan's mountains are known for khawlani coffee beans, Access to mountain farms has been a challenge, which the Haze of Beans helps solve by being strategically located between mountains and the farms. This enhances accessibility, supports cultivation, and promotes global export while reflecting the culture .
