## SUMMARY

An experienced project manager and civil engineer, I have a rich background in managing a number of government projects for the Riyadh Region Municipality, as well as residential development projects in Egypt. I possess strong skills in project planning, resource allocation, risk management, building strong relationships with suppliers, and monitoring performance. Throughout my career, I have contributed to the completion and management of several successful projects despite resource constraints, achieving these goals before deadlines. I hold a Bachelor's degree in Civil Engineering from Al-Azhar University and a PMP® certification from the Project Management Institute.

## WORK EXPERIENCE

**Project Manager, Rashid Hamad Al-moslam & Son Contracting CO, Riyadh, Saudi Arabia** Jan 2012 – Present

**Managing and implementing government projects for the Riyadh Municipality** including the construction, maintenance of public parks and gardens, underground tanks, and buildings, ensuring timely delivery within scope and budget.

- Develop detailed project plans, including timelines, budgets, and required resources.
- Lead cross-functional teams, guiding them toward achieving project goals efficiently.
- Identify potential risks to the project and develop strategies to mitigate or manage them.
- Allocate resources effectively and track their usage throughout the project lifecycle.
- Coordinate with clients, suppliers, and stakeholders to ensure smooth project execution.
- Track project progress against the plan and provide regular updates to senior management.
- Prepare reports on project performance and highlight any delays or issues that may impact timelines or budgets.
- Make effective decisions to resolve any issues or challenges that arise during project execution.
- Ensure all project aspects meet the established quality standards.

**Site Civil Engineer, Al-Mustapha for General Contracting, Egypt** Sep 2008 – Oct 2011

**Construction of residential villas, chalets and rooms for electrical transformers.**

- Oversee site operations to ensure adherence to technical specifications and project plans.
- Implement quality control measures and safety standards throughout the project lifecycle.

- Prepare progress reports, document work stages, and identify potential challenges.
- Working with clients, contractors, and consultants to ensure project execution according to specifications.
- Ensure projects meet local and international engineering and environmental regulations.

**Site Civil Engineer, Egyptian Company for Development and Project Management, Egypt**

**Jun 2007 – May 2008**

**Implementing Structural Works for Residential Towers and Villas**

- Overseeing on-site construction activities to ensure alignment with approved engineering plans and designs, from excavation through to finishing touches.
- Assessing the quality of materials utilized and confirming their compliance with technical specifications, while ensuring adherence to safety and quality standards throughout all phases of work.
- Documenting the progress of work and preparing regular technical reports on project advancement and the status of completed tasks, submitting these to the appropriate officials.
- Monitoring the execution of reinforcement, casting, and curing processes for all concrete elements.
