

IJAZ UL HAQ

Civil ENGINEER

Riyadh, Saudi Arabia | +966593062152 | ulhaqijaz03@gmail.com | <https://www.linkedin.com/in/ijaz-ulhaq/>

Civil Engineer with 5+ years of experience in QA/QC and site execution works, with a strong background in contractor environments across major civil projects in Saudi Arabia and Pakistan. Proven expertise in inspections, reviewing technical submittals, supervising site activities, and ensuring quality standards throughout project delivery. Skilled in CAD software and experienced in handling QA/QC documentation including WIRs, MIRs, SORs, NCRs, Prequalifications, and Material Submittals. Holds a transferable Iqama and is available for immediate joining, recognized for combining technical expertise with hands-on site leadership and quality-driven execution.

PROFESSIONAL EXPERIENCE

Civil Inspector – Taj Construction Co. (Riyadh Saudi Arabia) **Residential & Commercial Buildings – Riyadh, Saudi Arabia**

Nov 2024 - July 2025

- Conducted inspections for 100+ structural and finishing works including concrete, block work, plaster, flooring, and waterproofing to ensure compliance with project specifications.
- Prepared and submitted 200+ IRs and MIRs, securing timely approvals and maintaining smooth workflow with consultants.
- Verified materials and workmanship against approved drawings, material submittals, and method statements, ensuring full quality compliance.
- Coordinated daily with subcontractors and site engineers to resolve quality issues and meet inspection schedules.
- Issued and closed NCRs by following up on corrective actions, preventing recurrence of non-conformities.
- Maintained QA/QC records, reports, and test documentation to support audits and project handover requirements.

QA/QC Inspector – Bu Humaid Engineering Consultant – Ajman, UAE **G+5 & G+4 Mixed-Use Buildings – Ajman, UAE**

Aug 2023 - Sep 2024

- Inspected over 60 residential villas and 2 commercial buildings, validating structural and finishing works against approved shop drawings and QA/QC standards.
- Assisted in reviewing 20+ material submittals, including concrete, blockwork, plaster, flooring, and architectural finishes, guiding contractors to meet consultant specifications.
- Mitigated 15+ major defects through proactive site inspections, ensuring compliance and accelerating handover timelines.
- Maintained digital QA/QC documentation, improving audit readiness and enabling efficient consultant approvals.
- Supervised execution of 2,500 sqm of flooring and 250+ gypsum/cement boards, ensuring alignment, durability, and architectural quality.

Civil Site Engineer – SCKON Developers and Real Estate Advisors – Islamabad **Urban Heights Commercial (Basement + G+7) & Designer Villas – Islamabad,** **Projects Budget : PKR 200M**

Jan 2022 - June 2023

- Managed all on-site construction activities from foundation to finishing, coordinating with subcontractors including steel, formwork, concrete, brickwork, tile, electrical, and plumbing teams, ensuring timely and quality execution.
- Supervised and guided skilled and unskilled labor, monitored progress, and ensured all work complied with structural and architectural drawings.
- Checked material quality and quantity, verified steel fixing, concrete works, and finishing to meet project specifications and standards.
- Coordinated complex tasks across multiple trades, resolving technical challenges, especially in multi-level and designer houses with unique architectural requirements.
- Ensured smooth project handover by maintaining quality standards, progress documentation, and compliance with design specifications.
- Delivered a complex multi-level Designer House resolving technical challenges in unique architectural layouts and completing successful handover.

Civil Site Engineer – Gulam Rasool and Company – Swat, Pakistan
Gorkin Matiltan Hydro Power Project (84 MW) – Kalam, Swat, Pakistan
Projects Budget : PKR 35750 M

Oct2019 - Dec2021

- Managed all weir and Desander site activities, supervising site operations according to structural and civil drawings, including steel fixing, formwork, and concrete works.
- Coordinated with formwork and steel foremen, surveyors, trainee engineers, labor teams, and safety officers to ensure smooth workflow and compliance with quality and safety standards.
- Planned and executed large-scale concrete pours (e.g., 400 m³ every 2–3 days) using automobile and stationary concrete pumps, ensuring proper curing, waterproofing, and structural integrity.
- Monitored and maintained site equipment and resources, including concrete pumps, machinery, and labor allocation for efficient project execution.
- Collaborated with German and Chinese joint venture teams, following international construction standards and quality practices for hydro power project.
- Delivered concrete works under challenging water-flow conditions, ensuring structural stability and adherence to international quality standards
