CAREER SUMMARY

Expert project engineer **with 11 years of experience** successfully completing **low-current and programming projects**. Skilled in overseeing technical staff and ensuring that projects are finished on time, with expertise in **project management, leadership, problem solving, and communication**.

WORK EXPERIENCES

Project Manager, *DCM Company*

- Achieved high sales over four years by developing and managing the development and programming departments and executing targeted marketing campaigns on social media platforms and Google Ads.
- Enhanced online presence and engagement by developing and implementing successful marketing tactics, leading to higher website traffic and acquiring customers.
- Coordinate the customer onboarding process in collaboration with the commercial team and all relevant support functions.
- Maintain customer relationships by addressing critical business concerns, ensuring key individuals are updated, and escalating issues internally or externally as required, following company protocols.
- Develop and implement business review processes and operational alignment activities to ensure proactive communication and achievement of customer KPIs.

01/2021 – Present
Riyadh, Saudi Arabia

Electronics Engineer, *Alkhaldi EST*

- Supervised the design and implementation of many low-current systems, including public address systems, professional AV systems, translation and conference systems, CCTV systems, lighting systems, façade lighting, smart control, fire alarm, and access control systems, while following to industry standards. Important projects include the King Abdullah Financial Centre, Al- Kharj University's College of Computer Science, and Hail University's College of Business Administration.
- Conducting detailed design studies and applying best practices in system integration and project management resulted in increased system efficiency and dependability.
