

Abdulaziz Abdulrahman Boshi

Architecture Engineering and Management & Administration

OBJECTIVE

My objective is to exhibit my skills as an architectural engineer and an effective team in environmentally sustainable projects. A person who can be able to adapt to all conditions of work, I have a great ability to plan and create aesthetic and high-end functional buildings and able to use the technological aspects and integrated design of environmental systems, structural systems, behavior, and properties of building components and materials, and project management & business administration. I have the knowledge, analytical ability, perspectives, and managerial skills in the field of business administration and marketing. Develop appropriate strategies for professional development and problem solving.
