

ARCHITECT/CIVIL ENGINEER

PROFILE

I am a dedicated and detail-oriented Civil Engineer with solid experience in the design, planning, and execution of both civil infrastructure and building projects. Combining strong technical expertise with practical problem-solving skills, I strive to deliver sustainable, efficient, and safe engineering solutions. I excel in multidisciplinary team environments and have a keen eye for quality, safety, and regulatory compliance. My analytical mindset and proactive approach enable me to overcome technical challenges and achieve project goals within time and budget constraints.

EDUCATION/COURSE

Amsterdam's school, Amsterdam

2020-2022
Civil engineering

INHOLLAND University of Applied Sciences, Haarlem

2010 - 2011
HBO engineering (architecture and urban planning). Diploma obtained

University of Amsterdam

2005 - 2009
(Bachelor of Science in Architecture, Urbanism and Building Sciences)

WORK EXPERIENCE

Municipality of Amsterdam - Civil Engineer/project leader

2019 - today

- Developed and reviewed designs for public infrastructure projects, including roads, sidewalks, and stormwater management systems, ensuring compliance with local regulations and sustainability goals.
- Conducted site inspections and assessments to monitor ongoing municipal construction projects, guaranteeing adherence to safety standards and quality requirements.
- Coordinated with various municipal departments, contractors, and external stakeholders to plan and execute maintenance and rehabilitation projects effectively. Prepared technical reports, permits, and tender documents for public procurement processes.
- Managed GIS data and utilized civil engineering software to support urban planning and infrastructure development. Provided technical advice and support during public consultations and community meetings regarding infrastructure projects.
- Drawings, wenstracés, creating a contract, preparing, coordinating and planning various projects in the field of civil and infrastructure engineering.
- Developments BIM/3D, systems engineering.
- Represent the municipality of Amsterdam in the northern district as an expert.

HOBBIES

Play football
To travel
Swimming
Reading books

LANGUAGES

Arabic	mother tongue	
Dutch	very good	
English	good	

Stamhuisgroep- Modeler/measurer

2017 - 2019

- 3D modeling (Specialty airframe modeling - Point Cloud)
- Specialty: 3D measuring and creating Revit families

Dura Vermeer - BIM modeler/advisor

2016 - 2017

- Modeling in Revit, solving engineering issues.
- Translate the architect's sketch into a 3D model for the ground-level homes.
- Responsible for designing and calculating structural components for residential and commercial building projects in compliance with relevant standards (NEN, Eurocodes).
- Supervising construction projects on-site to monitor progress and ensure quality standards

Van Herwijnen (Contracting company) - Work planner

2015

- Responsible for daily management and coordination of road construction, sewer, and cable/pipe works on various infrastructure projects.
- Monitoring progress, quality, and safety on-site in accordance with project schedules and legal regulations.
- Coordinating personnel, equipment, and subcontractors to ensure efficiency and timely project delivery.
- Identifying and resolving issues and unexpected situations during execution.
- Communicating with clients, project managers, and inspectors to ensure requirements and agreements are met.
- Reporting progress, change orders, and deviations to project management.

CORE SKILLS
