CORE COMPETENCIES

Arabic and English
MS Office & AutoCAD
Problem Solving
Leadership

Inspection Procedures
Site Inspections
Project Management
Communication

Quality Documentation
Site Assessment
On-site Supervision
Technical Knowledge

WORK EXPERIENCE

Project Engineer – Qa/Qc Engineer

Oct 2024 – Present

Saudi Icon, Saudi Arabia, Qiddiya

Project: QSP, Qiddiya:

- Conducted thorough site inspections to verify adherence to Method Statements, Inspection & Test Plans (ITPs), and safety protocols, ensuring the highest standards of work and compliance with industry regulations.
- Managed and supervised on-site teams, promptly addressing discrepancies and maintaining continuous compliance to prevent project delays.
- Oversaw the preparation, management, and submission of Work Inspection Requests (WIRs) and Material Inspection Requests (MIRs), ensuring timely approvals from clients to maintain uninterrupted project progress.
- Closely monitored project timelines and progress, ensuring alignment with engineering standards, client specifications, and regulatory requirements.
- Led project teams in tracking progress, ensuring adherence to established schedules and budget constraints
- Ensured overall project quality by enforcing compliance with client requirements and industry standards through regular inspections and cross-departmental collaboration.
- Developed and implemented corrective action plans when necessary to mitigate risks
- Actively coordinated with contractors to ensure that all work was executed in line with project specifications and client expectations.
- Managed the post-processing optimization process, overseeing best practices to ensure quality and efficiency in the final product preparation and delivery.
- Resolved technical issues swiftly by utilizing hands-on engineering solutions, maintaining project momentum, and ensuring client satisfaction throughout the lifecycle of the project.
- Led the project team by providing clear guidance, setting objectives, delegating tasks, and optimizing resource utilization. Conducted regular performance reviews to foster a culture of continuous improvement and professional development.
- Provided continuous technical guidance and support to the team, ensuring project milestones were met and all deliverables adhered to client expectations and engineering standards.

Project Engineer – Qa/Qc Engineer

Aug 2023 – Oct 2024

EMESSA (Eastern Modern Specialist Artist), Saudi Arabia, Riyadh

Project: *King Salman Park – Royal Arts Complex*

- Led the coordination efforts with various contractors and project teams, expediting project timelines and resolving phasing issues.
- Oversaw the implementation of Reinforcement Lawn (Geocell and Geogrid) systems for site stabilization and erosion control, enhancing the longevity of infrastructure.
- Supervised the integration of urban amenities including cycle stands, bollards, precast concrete benches with travertine marble finish, wood and steel chairs, and drinking fountains, ensuring both functionality and aesthetic appeal.
- Managed procurement, installation, and maintenance of urban amenities, ensuring adherence to safety and accessibility standards.
- Conducted quantity surveys to accurately estimate material requirements, optimizing resource allocation and reducing waste.
- Performed comprehensive site assessments to ensure the successful installation and performance of all project elements.
- Prepared Inspection and Test Plans (ITPs) and method statements for various project items, ensuring compliance with quality and safety standards.

Project Engineer – Qa/Qc Engineer

May 2023 – Aug 2023

EMESSA (Eastern Modern Specialist Artist), Saudi Arabia, Kharj

Project: *Elite Specialists Industry Factory*

- Managed all phases of factory construction projects, including excavation, backfill, foundation, and structural elements.
- Conducted site surveys and soil analysis to determine the appropriate excavation and foundation methods.
- Oversaw excavation activities, ensuring proper site preparation and compliance with safety regulations
- Managed backfill operations, monitoring compaction and soil stabilization techniques.
- Supervised the installation of (foundations, columns, beams, steel components, and hangers) ensuring adherence to structural drawings and specifications.
- Provided technical support and guidance to construction teams, resolving technical challenges and ensuring work was carried out efficiently and accurately.

Project Engineer – Qa/Qc Engineer

Apr 2022 – May 2023

EMESSA (Eastern Modern Specialist Artist), Saudi Arabia, Riyadh

Project: *MISK School Project – Mohammad Bin Salman Non-Profit City:*

- Managed various internal Finishing works
(Gypsum board installation, Flooring tiles, Wooden cladding, etc...)
- Oversaw extensive landscape projects including
(Footing, columns, retaining wall, texture block wall, Cycle stand Bollard, timber screening, CNC screen, pergola, Gates, Fence, water proofing, Granite planters, Etc...)
- Coordinated post-project completion control inspections in collaboration with consultants, ensuring necessary adjustments for seamless handover
- Led material and work inspections for MISK School Project, maintaining strict adherence to quality standards and project specification
- Promoted a safety culture on site, actively contributing to secure working environment
- Facilitated smooth workflows by coordinating with subcontractors and ensuring timely project completion.
- Reporting daily summary of a project-to-Project Manager
- . Ensure the work flow according to Project Time Line
- Implemented the installation of precast terrazzo planters strategically enhancing the school grounds.
- Directed conceptualizing, and construction of both external and internal architectural elements contributing to the project.

Site Engineer

Jan 2021 – Apr 2022

EMESSA (Eastern Modern Specialist Artist), Saudi Arabia, Riyadh

Project: *King Abdullah Financial District (KAJD) Zone 5:*

- Led the hardscape and softscape initiatives for the King Abdullah Financial District Zone 3, shaping the outdoor environment to meet project objectives
- Contributed significantly to the design and development of four towers ensuring alignment with project specification and architectural vision
- Managed internal finishing works involving GRP panels and tiling installations, maintaining high-quality standards throughout
- Generated daily progress reports, documenting challenges and proposing effective solutions
- Proper management of materials and workshop
- Performing general construction duties on site
- Regularly checking progress of work according to the schedule
- Managing, developing, creating and maintaining construction projects

EDUCATION

Bachelor of Engineering, Civil Engineer, Cyprus International University, Cyprus **2020**

- **Graduation Project: 300km Highway Design.**
 - Engineered a 300km highway, overseeing illumination implementation.
 - Conducted group-level studies and analyzed above-water-level considerations.
