<b>Employer</b>	AL RAJHI ADVANCED CONSTRUCTIONS, RIYADH SAUDI ARABIA
<b>CLIENT</b>	NATIONAL WATER COMPANY (PIPE LINE )
<b>Project</b>	17(A) STRATEGIC WATER SUPPLY
<b>Role</b>	CIVIL SITE SUPERVISOR
<b>Description</b>	<ul style="list-style-type: none"><li>• Conduct pipe line safety evaluations, including accident and incident investigation</li><li>• Coordinates with subcontractors and other stakeholders to address quality and safety concerns</li><li>• Pre – work briefing to the workers for providing an idea of the work allocation and maintaining safety standards</li><li>• Preparing daily reports for the daily work progress and issues for delaying work progress</li><li>• Ensuring the measurements excavation depth, width on the excavation time.</li><li>• Ensure the level and alignment of pipe laying and coordinate with survey dept</li><li>• Coordinate with QA/QC Engineers, Consultants on inspection and testing requirements.</li><li>• Monitoring worker attendance and schedule and supervise all subcontractor work quality and production levels to ensure the highest standards are achieved</li><li>• Calculate, monitor and track all materials required for the project</li></ul>

## **ABILITIES**

During 15 years' experience in the Middle East and 2 years in India, I have increased my professional working skills to meet international standards and improved the ability to work under pressure independently and also created the ability to gain achievements/appreciations from the employer with my hard work capabilities, sincerity and discipline.

## **SKILLS**

- Enforcing safety protocols on site.
- Monitoring worker attendance.
- Schedule, monitor and supervise all subcontractor work quality and production levels to ensure the highest standards are achieved.
- Analysing blueprints to ensure that construction projects meet design, safety, and budget specifications.
- Supervising and instructing the construction team as well as subcontractors.
- Evaluating the performance of construction employees and instituting disciplinary measures as needed.
- Calculate, monitor and track all materials required for the project.
