- Survey & Alignment Checks
- Inspection & Test Plans (ITP)
- Non-conformance Reporting (NCR)
- Progress Monitoring
- AutoCAD Drafting
- Communication & Leadership
- Problem-Solving & Decision-Making

## Professional Summary

Dynamic and results-oriented Civil QA/QC Engineer with over 12 years of diversified GCC experience in Civil Technology across Oil & Gas Plants, Infrastructure Projects, and Road & Utility Inspections. Approved by Qatar Kahramaa as a QA/QC Engineer. Proven expertise in contracting and consultancy roles, handling projects from initiation to completion, including snagging and closing punch items. Well-versed in Qatar Construction Standards (QCS 2014), Qatar Gas, and Aramco codes. Strong communication skills in Arabic and English. Seeking challenging opportunities to leverage expertise in quality assurance, compliance, and project execution.

## Work Experience

AL JABER HADEED CONSTRUCTION W.L.L (JH CONS) – Doha, Qatar  
**QA/QC Engineer | Interim Improvement of the B Ring Road, Al Mannai and Guest Pal Experience Project**

Client: ASHGHAL | Project No: C2019/22

Apr 2019 – Dec 2024

JMC INERNY ACON W.L.L – Doha, Qatar

Jan 2014 – Jan 2016

HARDBORN INTERNATIONAL PVT LTD – Pakistan

**Junior Site Engineer | DHA Phase 6 Development Project**

Client: Communication and Works Department

Dec 2012 – Dec 2013

### Responsibilities

#### **Quality Assurance & Compliance**

- **QA/QC Management:** Ensure compliance with international standards, project specifications, QCS 2014, and contract requirements by reviewing PQP, technical documents, and contracts to guarantee seamless project execution.
- **Regulatory Compliance:** Maintain continuous alignment with local laws, regulations, and group standards, verifying that all quality activities meet client and project-specific requirements.
- **Corrective Actions:** Monitor and verify implementation of corrective and preventive actions, ensuring swift resolution of non-conformances and fostering continuous improvement in project quality systems.

#### **Inspection & Testing Coordination**

- **Material Testing:** Supervise and coordinate laboratory and field testing of construction materials, ensuring compliance with project standards, acceptance criteria, and timely delivery of TPI witness reports.
- **Site Inspections:** Conduct comprehensive material receiving inspections (MIR) and prepare RFI (Request for Inspection) documents in accordance with ITP, guaranteeing that approved materials and equipment meet project specifications.
- **Testing Oversight:** Witness and validate tests on concrete, soil, asphalt, and water (e.g., slump test, FDT, DFT, TDS), ensuring accuracy and alignment with client requirements and international codes.

### Documentation & Reporting

- **Quality Documentation:** Prepare, review, and update quality logs including MAR, IRE, MIR, calibration, and NCR logs to ensure accurate records for audits and project compliance.
- **Quality Reporting:** Generate weekly and monthly inspection activity reports detailing material inspections, non-conformances, and site quality status to support informed decision-making.
- **Document Control:** Collaborate with document controllers to maintain effective control over quality records, ensuring timely retrieval and compliance with record-keeping standards.

### Team Coordination & Client Interface

- **Client & Consultant Coordination:** Lead and coordinate site visits with clients, consultants, and third-party agencies to ensure alignment on project quality requirements and inspections.
- **Team Leadership:** Monitor and assign tasks to the quality control team, promoting sustainable quality control practices and enhancing team performance through continuous feedback and training.
- **Training & Communication:** Conduct toolbox talks and quality awareness sessions to promote understanding of quality standards, improving project execution and compliance.

### Project Execution & Continuous Improvement

- **Construction Monitoring:** Review IFC and shop drawings to ensure proper construction methods and adherence to quality standards prior to execution of works.
- **Quality Improvement:** Assist the QA/QC Manager in implementing and refining quality management procedures, facilitating audits, and addressing gaps in quality systems.
- **Project Close-out:** Oversee project punch list, snagging, and final inspections to ensure completion meets client expectations and contractual requirements.

## Education

---

### Diploma of Associate Engineer in Civil Engineering

Punjab Board, Pakistan

### Matriculation

Board of Intermediate and Secondary Education, Gujranwala

### AutoCAD Certification

Punjab Computer College, Govt. of Punjab
