

ABDULAZIZ ADEL

IT ENGINEER

BRIEF ABOUT ME

An operations and information technology engineer with experience in telecommunications and fiber optic infrastructure projects, I have worked with operating companies such as Mobily and Fiber. I am proficient in the use of government platforms, such as the Riyadh Infrastructure Projects Platform, the Baladi platform for drilling permits, and the Ministry of Transport platform, and in coordination with all service agencies. I have extensive experience in preparing detailed reports to monitor field work and progress rates. In addition, my university specialization in information technology has enabled me to find innovative software solutions to challenges facing projects and develop systems that help improve efficiency and expedite procedures. I combine engineering, technical, and software skills, allowing me to work flexibly in both technical and field environments.
