## CAREER OBJECTIVE

---

I seek to gain more engineering experience by working in a professional environment that allows me to develop my skills in project execution monitoring and incident analysis to ensure compliance with technical standards and requirements. I aspire to enhance my practical knowledge and contribute to improving field operations to ensure the quality and efficiency of project implementation.

## EDUCATION

---

Bachelor's Degree in Civil Engineering | Technical College

## EXPERIENCES

---

**Field Monitoring Operations Inspector | Saudi Company for Comprehensive Technical and Security Control (Tahakom) Infrastructure Projects Center – Riyadh Region.** 15/2/2024 – Present

- Monitor and analyze reports, directing them to the relevant authorities with necessary evidence.
- Supervise excavation activities on-site to ensure compliance with approved standards and requirements, issuing violations when necessary.
- Directly intervene to handle accidents and disputes between contractors to ensure efficient workflow.

**Field Monitor | Emdaad Al-Khebrat , Ejada Excavation Project – Riyadh Municipality.** 3/10/ 2021 – 13/2/2024

- Supervised excavation activities on-site to ensure compliance with approved standards and requirements, issuing violations when necessary.
- Handled incidents related to fixed objects and resolved disputes between contractors to maintain smooth operations.
- Monitored and analyzed reports, directing them to relevant authorities with necessary evidence.

## COURSES

---

- Professional Certification in Engineering Arbitration & Construction Contracts (FIDIC)
- Project Management Professional (PMP) | Knowledge & Skills Training Center
- Preparatory Course in Civil Construction | Taif Arabia Institute for Training
- Effective Marketing Skills | Business Solutions Center
- Human Resources Management | Business Solutions Center

## SKILLS

---

- Strong communication and coordination.
- Project supervision and compliance monitoring.
- Incident analysis and reporting.
- Excavation oversight and violation issuance.
- Conflict resolution between contractors.
- Proficiency in modern monitoring technologies.
- Knowledge of engineering regulations and codes.
