BRIFE SUMMARY: -

Civil Engineer with +8 years of experience in managing and executing infrastructure and building projects, including sanitary sewer networks, household connections, and residential villas. Skilled in overseeing all project phases from planning to delivery, ensuring quality, safety, and compliance with engineering standards. Proven ability to lead teams, coordinate stakeholders, and deliver projects on time and within budget.

EDUCATION: -

Bachelor's degree in civil engineering – Assiut University, Assiut, Egypt (Sep 2012 – Jul 2017)
Overall Grade: Good

PROFESSIONHAL EXPERIENCE: -

Senior Civil Site / Landscape Engineer – Dawaer Momtaddah General Contracting Establishment, Saudi Arabia (Sep 2024 – Present)-KSA

- Direct and oversee all civil and landscape construction works on-site, ensuring efficient workflow and timely project delivery.
- Lead the execution of specialized projects for water desalination plants in Yanbu and Al Madinah, adhering to client specifications, contractual obligations, and industry best practices.
- Ensure strict compliance with approved engineering drawings, technical specifications, quality control procedures, and company regulations.
- Coordinate effectively with consultants, contractors, and stakeholders to resolve technical and operational challenges.
- Enforce rigorous environmental, health, and safety (EHS) protocols across all site operations.
- Monitor project progress, prepare comprehensive site reports, and provide accurate updates to support informed management decision-making.

Civil Site Engineer - Bin Ibrahim General Contracting Establishment (20/11/2022- 20/9/2024)-KSA

(Supervising the implementation of 44 villas belonging to the Samref housing project at the Royal Commission in Yanbu)

- **Preparing and Analyzing Engineering Plans**
Studying and interpreting the structural and architectural plans of the project scientifically.
Ensuring that designs are feasible and align with on-site reality.
- **Managing Daily Operations on Site**
Supervising all daily activities on the site.
Ensuring that work is carried out according to the set schedules.
- **Managing the Workforce**
Coordinating work between all teams on-site (contractors, technicians, laborers).
Effectively distributing tasks and resources to ensure smooth workflow.
- **Monitoring and Supervising Execution**
Following up on the execution of construction and utility works on-site, such as excavation, concrete, and steel.
Ensuring that work complies with engineering specifications and approved standards.
- **Managing Materials and Equipment**
Monitoring and determining the site's material and equipment needs.
Ensuring that materials arrive on time and are used properly.
- **Solving Technical and Engineering Problems**
Handling any issues that arise during execution and providing suitable technical solutions.
Coordinating with consulting engineers and contractors in case of changes or challenges.
- **Cost Control**
Monitoring resource usage, including materials and labor, to ensure adherence to the budget.
Managing costs associated with delays or changes in the project.
- **Conducting Inspections and Tests**
Supervising material tests (such as soil, concrete, and foundation tests) to ensure their quality and integrity.
Ensuring that all tests are conducted according to approved standards.
- **Monitoring Timing and Schedule**
Ensuring the project adheres to the agreed-upon schedule.
Managing any delays and coordinating to find effective solutions.
