Education

2018

obour institutes Bachelor - Information systems

Grade: Good

Graduation Project: Website Golden Library (ASP.NET)

Graduation Project Grade: Excellent

Experience

2019-7 - 2020-1

my deal IT Infrastructure

oversee the design, implementation, and maintenance of network infrastructure to ensure high performance and security.

Responsibilities:

Network Design:

Develop and plan network designs based on organizational needs.

Select appropriate components (routers, switches, servers).

Project Implementation:

Supervise the installation and configuration of networks.

Ensure system compatibility with required standards.

2020-1 - 2022-1

Elsewedy Print House IT Help Desk

Provide help desk support to end-user proprietary software and

Installs and configures computer hardware, software, systems, networks, printers, and scanners

Training the end-users on the use and features of the various operating systems and applications on various platforms.

Monitor and maintain computer systems and networks.

2022-1 - 2022-8

Napco Pharma IT Technical Support

Installing and configuring computer hardware, software, networks, printers and scanners.

Monitoring and maintaining computer systems and networks and its confidentiality.

Tracking and following-up the IT hardware stock.

Work with Active Directory, DHCP, DNS and troubleshoot daily problems

Work with the Kaspersky Security Center to keep clients updated and secured

Work with Sophos XG firewall and create firewall policies up on request

2022-8 - Current

Source Machinery IT Administrator

Monitoring and maintaining networks and servers.

Upgrading, installing and configuring new hardware and software to meet company objectives.

Developing data retrieval and recovery procedures.

Designing and implementing efficient end-user feedback and error reporting systems.

Supervising and mentoring IT department employees, as well as providing IT support.

Assessing the needs of various departments.

Developing the technology used within the company.

Overseeing the implementation of an ERP system that includes all departments.

Maintaining data confidentiality and managing user permissions.

Connecting Branches to Head Office

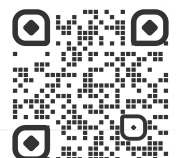

Linking all company branches to the central administration.

Controlling access to employee devices.

Establishing policies for using company devices and sharing files through servers.

Establishing policies for end-user internet usage.

Mitigating risks faced by companies.

CAMBRIDGE
International Examinations

Talal Abu-Ghazaleh Organization

Validated award in collaboration with
Cambridge International Examinations

International Diploma in IT Skills

Foundation Level Certificate

awarded to

AHMED ALI ABD ELAZIZ ALI

at

INFORMATION SYSTEMS INSTITUTE

The candidate has achieved the required standard in the following modules:

Introduction To IT
Using The Computer And Managing Files
Word Processing
Spreadsheets
Presentations
Databases
Electronic Communication

Chairman
Talal Abu-Ghazaleh Organization

Chief Executive
Cambridge International Examinations

Candidate Number: TAGEG1008 ISN512733
March 2016

CERTIFICATE OF COMPLETION

THIS CERTIFIES THAT

Ahmed Ali Abdelaziz Ali Elkholy

Has successfully completed **Digital Egypt Youth Program**

CCNA v7

Oct 2021

With Score 90 %

Student ID: 23028
Duration : One Month

NTI DIRECTOR

CCNAv7: Switching, Routing, and Wireless Essentials

The student has successfully achieved student level credential for completing CCNAv7: Switching, Routing, and Wireless Essentials course administered by the undersigned instructor. The student was able to proficiently:

- Configure VLANs and Inter-VLAN routing applying security best practices.
- Troubleshoot inter-VLAN routing on Layer 3 devices.
- Configure redundancy on a switched network using STP and EtherChannel.
- Troubleshoot EtherChannel on switched networks.
- Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.
- Configure dynamic address allocation in IPv6 networks.
- Configure WLANs using a WLC and L2 security best practices.
- Configure switch security to mitigate LAN attacks.
- Configure IPv4 and IPv6 static routing on routers.

CCNAv7: Introduction to Networks

The student has successfully achieved student level credential for completing CCNAv7: Introduction to Networks course administered by the undersigned instructor. The student was able to proficiently:

- Configure switches and end devices to provide access to local and remote network resources.
- Explain how physical and data link layer protocols support the operation of Ethernet in a switched network.
- Configure routers to enable end-to-end connectivity between remote devices.
- Create IPv4 and IPv6 addressing schemes and verify network connectivity between devices
- Explain how the upper layers of the OSI model support network applications.
- Configure a small network with security best practices.
- Troubleshoot connectivity in a small network.

CCNAv7: Enterprise Networking, Security, and Automation

The student has successfully achieved student level credential for completing CCNAv7: Enterprise Networking, Security, and Automation course administered by the undersigned instructor. The student was able to proficiently:

- Configure single-area OSPFv2 in both point-to-point and multiaccess networks.
- Explain how to mitigate threats and enhance network security using access control lists and security best practices.
- Implement standard IPv4 ACLs to filter traffic and secure administrative access.
- Configure NAT services on the edge router to provide IPv4 address scalability.
- Explain techniques to provide address scalability and secure remote access for WANs.
- Explain how to optimize, monitor, and troubleshoot scalable network architectures.
- Explain how networking devices implement QoS.
- Implement protocols to manage the network.
- Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.
